beliefs_society_1: Mensen moeten zelf kunnen beslissen of ze schadelijke middelen gebruiken.

Preferred policy per substance; bar = weighted % of respondents choosing that option (total above the bar), split by answer on the item. Geen mening and no opinion excluded. r = weighted Pearson correlation between policy option (1–9) and answer (1–7).
Policy options: 1 = Ban, 2 = Research only, 3 = Treatment only, 4 = Prescription only, 5 = Specialist shop, non-profit, 6 = Specialist shop, for-profit, 7 = Sold everywhere, no advertising, 8 = Sold everywhere, with advertising, 9 = Free sale.

beliefs_society_2: Drugsgebruik is slecht voor de normen en waarden van onze samenleving.

Preferred policy per substance; bar = weighted % of respondents choosing that option (total above the bar), split by answer on the item. Geen mening and no opinion excluded. r = weighted Pearson correlation between policy option (1–9) and answer (1–7).
Policy options: 1 = Ban, 2 = Research only, 3 = Treatment only, 4 = Prescription only, 5 = Specialist shop, non-profit, 6 = Specialist shop, for-profit, 7 = Sold everywhere, no advertising, 8 = Sold everywhere, with advertising, 9 = Free sale.

beliefs_society_3: Nederland moet zich houden aan het internationale verbod op drugs.

Preferred policy per substance; bar = weighted % of respondents choosing that option (total above the bar), split by answer on the item. Geen mening and no opinion excluded. r = weighted Pearson correlation between policy option (1–9) and answer (1–7).
Policy options: 1 = Ban, 2 = Research only, 3 = Treatment only, 4 = Prescription only, 5 = Specialist shop, non-profit, 6 = Specialist shop, for-profit, 7 = Sold everywhere, no advertising, 8 = Sold everywhere, with advertising, 9 = Free sale.

beliefs_society_4: Het is verkeerd om geld te verdienen aan middelen waar mensen verslaafd aan kunnen raken.

Preferred policy per substance; bar = weighted % of respondents choosing that option (total above the bar), split by answer on the item. Geen mening and no opinion excluded. r = weighted Pearson correlation between policy option (1–9) and answer (1–7).
Policy options: 1 = Ban, 2 = Research only, 3 = Treatment only, 4 = Prescription only, 5 = Specialist shop, non-profit, 6 = Specialist shop, for-profit, 7 = Sold everywhere, no advertising, 8 = Sold everywhere, with advertising, 9 = Free sale.

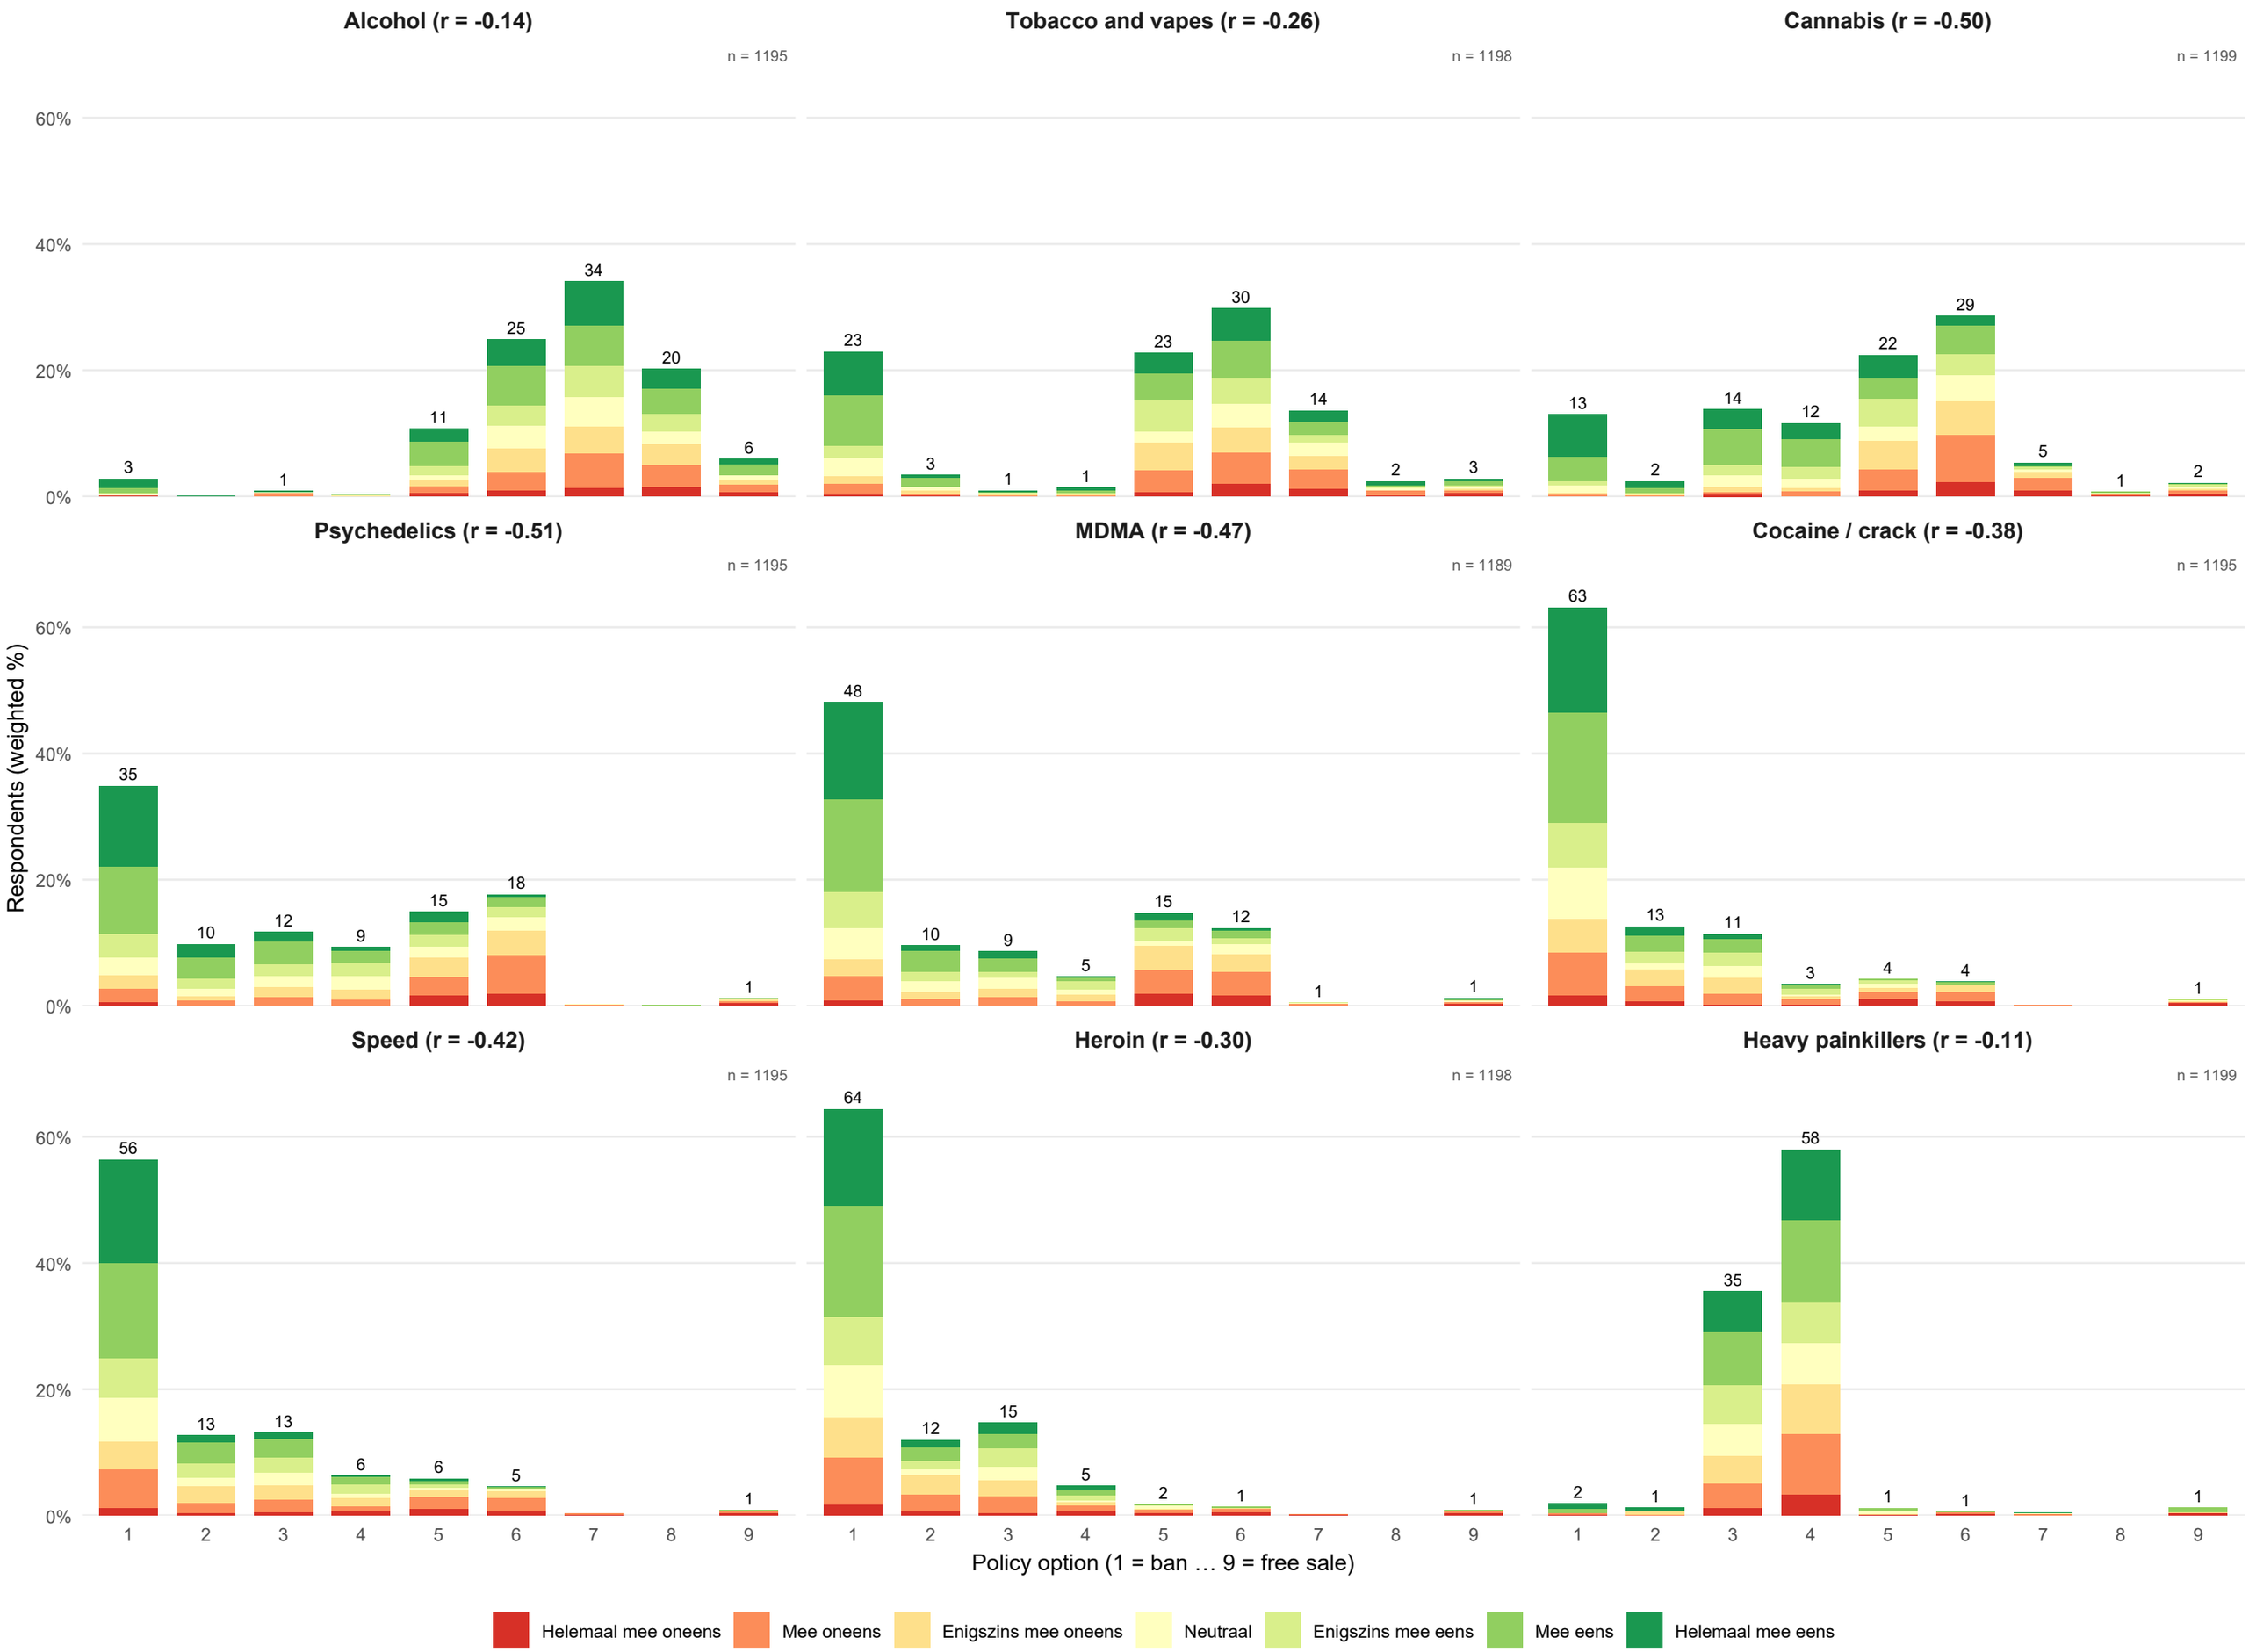

beliefs_society_5: We moeten streven naar een samenleving waarin niemand verslavende middelen gebruikt.

Preferred policy per substance; bar = weighted % of respondents choosing that option (total above the bar), split by answer on the item. Geen mening and no opinion excluded. r = weighted Pearson correlation between policy option (1–9) and answer (1–7).
Policy options: 1 = Ban, 2 = Research only, 3 = Treatment only, 4 = Prescription only, 5 = Specialist shop, non-profit, 6 = Specialist shop, for-profit, 7 = Sold everywhere, no advertising, 8 = Sold everywhere, with advertising, 9 = Free sale.

beliefs_addiction_1: Als een middel legaal te koop is, raken meer mensen eraan verslaafd.

Preferred policy per substance; bar = weighted % of respondents choosing that option (total above the bar), split by answer on the item. Geen mening and no opinion excluded. r = weighted Pearson correlation between policy option (1–9) and answer (1–7).
Policy options: 1 = Ban, 2 = Research only, 3 = Treatment only, 4 = Prescription only, 5 = Specialist shop, non-profit, 6 = Specialist shop, for-profit, 7 = Sold everywhere, no advertising, 8 = Sold everywhere, with advertising, 9 = Free sale.

beliefs_addiction_2: Mensen die verslaafd zijn zoeken eerder hulp als drugs niet verboden zijn.

Preferred policy per substance; bar = weighted % of respondents choosing that option (total above the bar), split by answer on the item. Geen mening and no opinion excluded. r = weighted Pearson correlation between policy option (1–9) and answer (1–7).
Policy options: 1 = Ban, 2 = Research only, 3 = Treatment only, 4 = Prescription only, 5 = Specialist shop, non-profit, 6 = Specialist shop, for-profit, 7 = Sold everywhere, no advertising, 8 = Sold everywhere, with advertising, 9 = Free sale.

beliefs_addiction_3: Mensen die verslaafd zijn hebben dat aan zichzelf te danken.

Preferred policy per substance; bar = weighted % of respondents choosing that option (total above the bar), split by answer on the item. Geen mening and no opinion excluded. r = weighted Pearson correlation between policy option (1–9) and answer (1–7).
Policy options: 1 = Ban, 2 = Research only, 3 = Treatment only, 4 = Prescription only, 5 = Specialist shop, non-profit, 6 = Specialist shop, for-profit, 7 = Sold everywhere, no advertising, 8 = Sold everywhere, with advertising, 9 = Free sale.

beliefs_addiction_4: Mensen die softdrugs gebruiken, gaan daarna ook vaak harddrugs gebruiken.

Preferred policy per substance; bar = weighted % of respondents choosing that option (total above the bar), split by answer on the item. Geen mening and no opinion excluded. r = weighted Pearson correlation between policy option (1–9) and answer (1–7).
Policy options: 1 = Ban, 2 = Research only, 3 = Treatment only, 4 = Prescription only, 5 = Specialist shop, non-profit, 6 = Specialist shop, for-profit, 7 = Sold everywhere, no advertising, 8 = Sold everywhere, with advertising, 9 = Free sale.

beliefs_addiction_5: Veel verboden harddrugs zijn ongezonder dan alcohol en tabak.

Preferred policy per substance; bar = weighted % of respondents choosing that option (total above the bar), split by answer on the item. Geen mening and no opinion excluded. r = weighted Pearson correlation between policy option (1–9) and answer (1–7).
Policy options: 1 = Ban, 2 = Research only, 3 = Treatment only, 4 = Prescription only, 5 = Specialist shop, non-profit, 6 = Specialist shop, for-profit, 7 = Sold everywhere, no advertising, 8 = Sold everywhere, with advertising, 9 = Free sale.

beliefs_regulate_1: Als een middel verboden is, gebruiken minder mensen het.

Preferred policy per substance; bar = weighted % of respondents choosing that option (total above the bar), split by answer on the item. Geen mening and no opinion excluded. r = weighted Pearson correlation between policy option (1–9) and answer (1–7).
Policy options: 1 = Ban, 2 = Research only, 3 = Treatment only, 4 = Prescription only, 5 = Specialist shop, non-profit, 6 = Specialist shop, for-profit, 7 = Sold everywhere, no advertising, 8 = Sold everywhere, with advertising, 9 = Free sale.

beliefs_regulate_2: De verkoop van drugs toestaan zou Nederland veel geld opleveren.

Preferred policy per substance; bar = weighted % of respondents choosing that option (total above the bar), split by answer on the item. Geen mening and no opinion excluded. r = weighted Pearson correlation between policy option (1–9) and answer (1–7).
Policy options: 1 = Ban, 2 = Research only, 3 = Treatment only, 4 = Prescription only, 5 = Specialist shop, non-profit, 6 = Specialist shop, for-profit, 7 = Sold everywhere, no advertising, 8 = Sold everywhere, with advertising, 9 = Free sale.

beliefs_regulate_3: Drugsgebruik is minder gevaarlijk als de verkoop wordt toegestaan.

Preferred policy per substance; bar = weighted % of respondents choosing that option (total above the bar), split by answer on the item. Geen mening and no opinion excluded. r = weighted Pearson correlation between policy option (1–9) and answer (1–7).
Policy options: 1 = Ban, 2 = Research only, 3 = Treatment only, 4 = Prescription only, 5 = Specialist shop, non-profit, 6 = Specialist shop, for-profit, 7 = Sold everywhere, no advertising, 8 = Sold everywhere, with advertising, 9 = Free sale.

beliefs_regulate_4: Een verbod werkt goed om jongeren te beschermen tegen de gevaren van verslavende middelen.

Preferred policy per substance; bar = weighted % of respondents choosing that option (total above the bar), split by answer on the item. Geen mening and no opinion excluded. r = weighted Pearson correlation between policy option (1–9) and answer (1–7).
Policy options: 1 = Ban, 2 = Research only, 3 = Treatment only, 4 = Prescription only, 5 = Specialist shop, non-profit, 6 = Specialist shop, for-profit, 7 = Sold everywhere, no advertising, 8 = Sold everywhere, with advertising, 9 = Free sale.

beliefs_crime_1: Er zou in Nederland minder criminaliteit zijn als de verkoop van drugs wordt toegestaan.

Preferred policy per substance; bar = weighted % of respondents choosing that option (total above the bar), split by answer on the item. Geen mening and no opinion excluded. r = weighted Pearson correlation between policy option (1–9) and answer (1–7).
Policy options: 1 = Ban, 2 = Research only, 3 = Treatment only, 4 = Prescription only, 5 = Specialist shop, non-profit, 6 = Specialist shop, for-profit, 7 = Sold everywhere, no advertising, 8 = Sold everywhere, with advertising, 9 = Free sale.

beliefs_crime_2: Er zou meer politie moeten worden ingezet voor de aanpak van drugs.

Preferred policy per substance; bar = weighted % of respondents choosing that option (total above the bar), split by answer on the item. Geen mening and no opinion excluded. r = weighted Pearson correlation between policy option (1–9) and answer (1–7).
Policy options: 1 = Ban, 2 = Research only, 3 = Treatment only, 4 = Prescription only, 5 = Specialist shop, non-profit, 6 = Specialist shop, for-profit, 7 = Sold everywhere, no advertising, 8 = Sold everywhere, with advertising, 9 = Free sale.

beliefs_crime_3: Het bezit van drugs voor eigen gebruik moet niet strafbaar zijn.

Preferred policy per substance; bar = weighted % of respondents choosing that option (total above the bar), split by answer on the item. Geen mening and no opinion excluded. r = weighted Pearson correlation between policy option (1–9) and answer (1–7).
Policy options: 1 = Ban, 2 = Research only, 3 = Treatment only, 4 = Prescription only, 5 = Specialist shop, non-profit, 6 = Specialist shop, for-profit, 7 = Sold everywhere, no advertising, 8 = Sold everywhere, with advertising, 9 = Free sale.

beliefs_crime_4: Drugsgebruikers zijn medeverantwoordelijk voor drugscriminaliteit.

Preferred policy per substance; bar = weighted % of respondents choosing that option (total above the bar), split by answer on the item. Geen mening and no opinion excluded. r = weighted Pearson correlation between policy option (1–9) and answer (1–7).
Policy options: 1 = Ban, 2 = Research only, 3 = Treatment only, 4 = Prescription only, 5 = Specialist shop, non-profit, 6 = Specialist shop, for-profit, 7 = Sold everywhere, no advertising, 8 = Sold everywhere, with advertising, 9 = Free sale.
