All respondents (n = 1237): weighted 2D density

Kernel density of the respondents' mean scores (same bandwidth as the party pages), scaled to the peak; all respondents with both scores, non-voters and other parties included. Dashed lines = sample means of the map parties (quadrant borders); red cross = mean of all respondents.

Where each party's voters are: weighted 2D density

Kernel density of the respondents' mean scores (same bandwidth for every party), scaled to each party's peak.
Dashed lines = sample means (quadrant borders); red cross = party mean.
