Parties by mean of the median policies: illicit drugs, with cannabis vs alcohol and tobacco

Per party and drug the weighted median answer (interpolated, grouped-data median), then the mean over the drugs of an axis.
With one drug on an axis this is the median itself.
x: cannabis, psychedelics, MDMA, cocaine, speed, heroin; y: alcohol, tobacco and vapes. Dashed lines = mean of the per-drug medians of all answers.
Axis ranges fitted per page and per axis. Logo size reflects n.
Geen mening excluded; non-voters, blank, Anders and DENK (n = 1) left out. Vote: TK 2025.

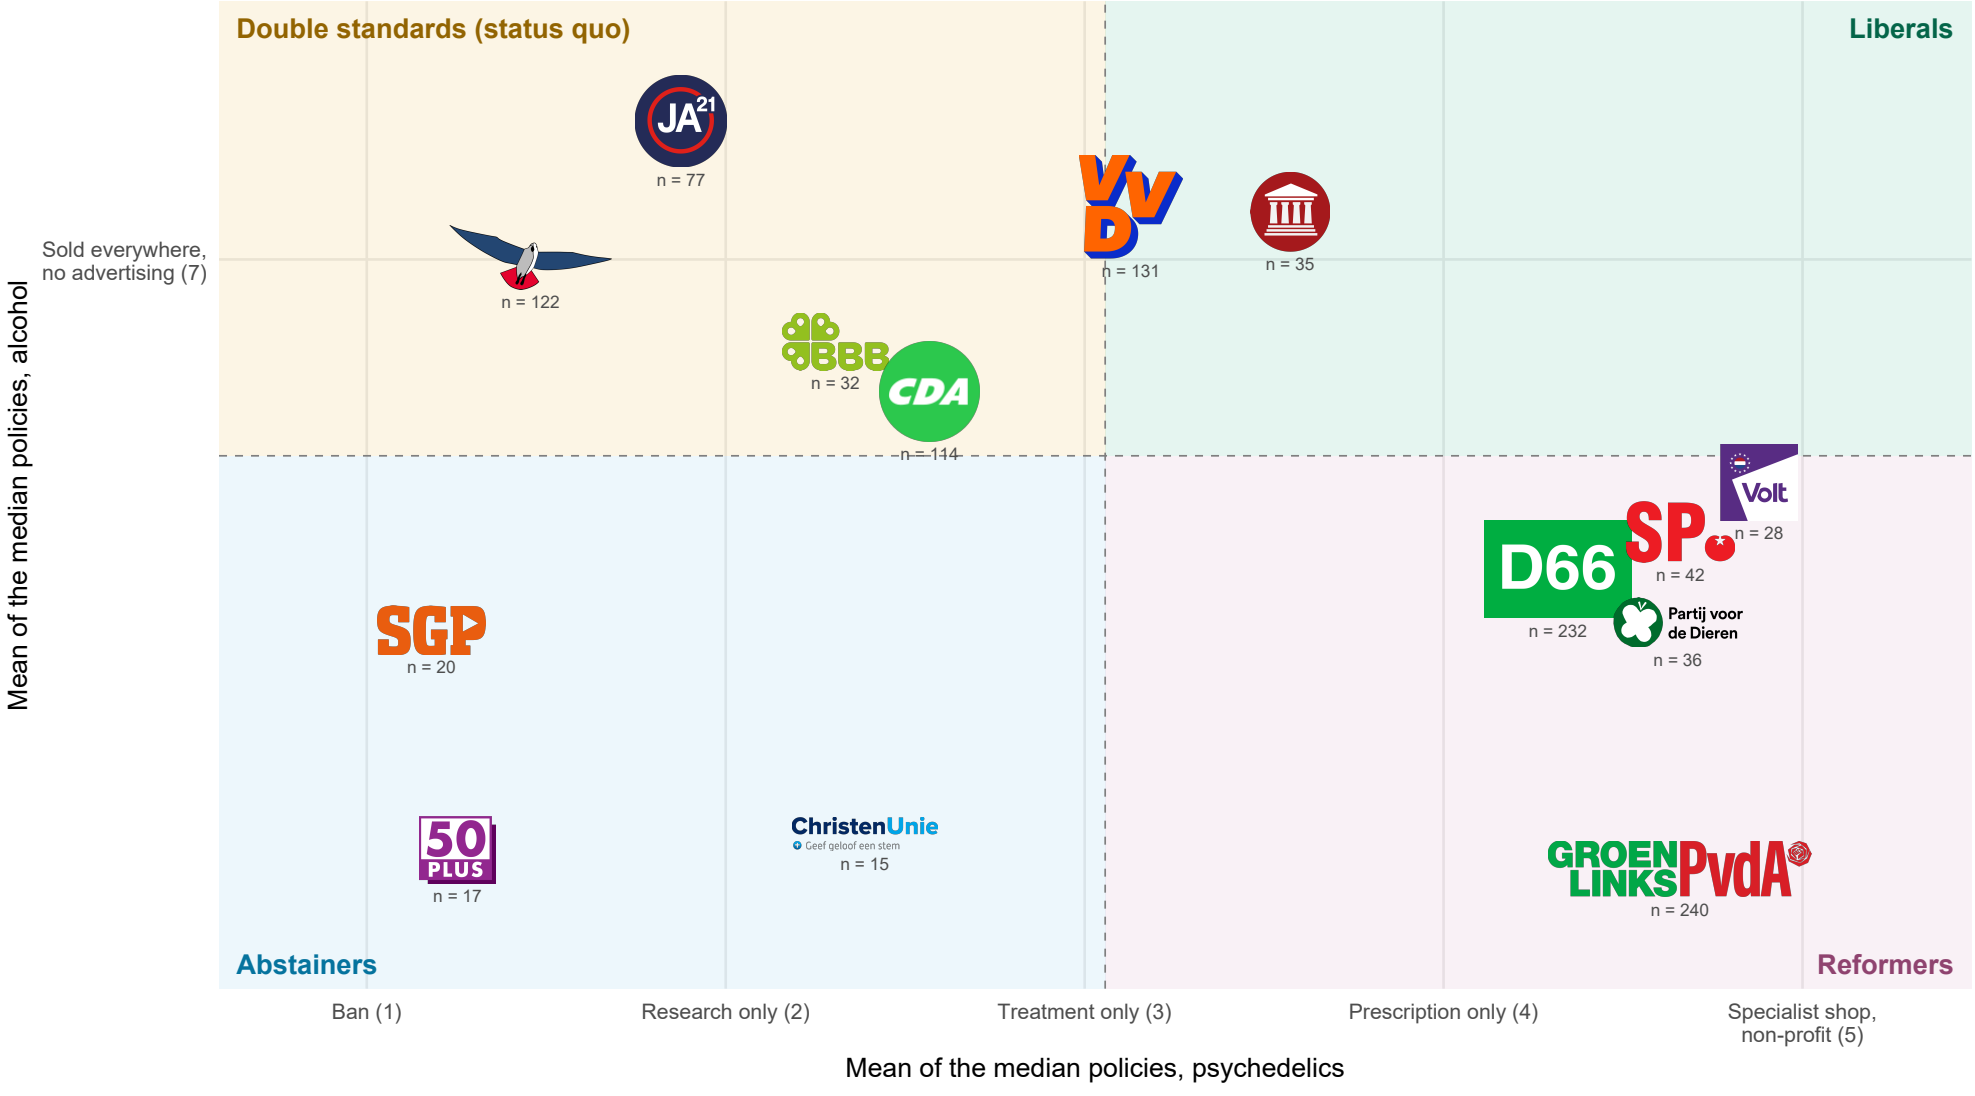

Parties by mean of the median policies: cannabis vs alcohol

Per party and drug the weighted median answer (interpolated, grouped-data median), then the mean over the drugs of an axis.
With one drug on an axis this is the median itself.
x: cannabis; y: alcohol. Dashed lines = mean of the per-drug medians of all answers.
Axis ranges fitted per page and per axis. Logo size reflects n.
Geen mening excluded; non-voters, blank, Anders and DENK (n = 1) left out. Vote: TK 2025.

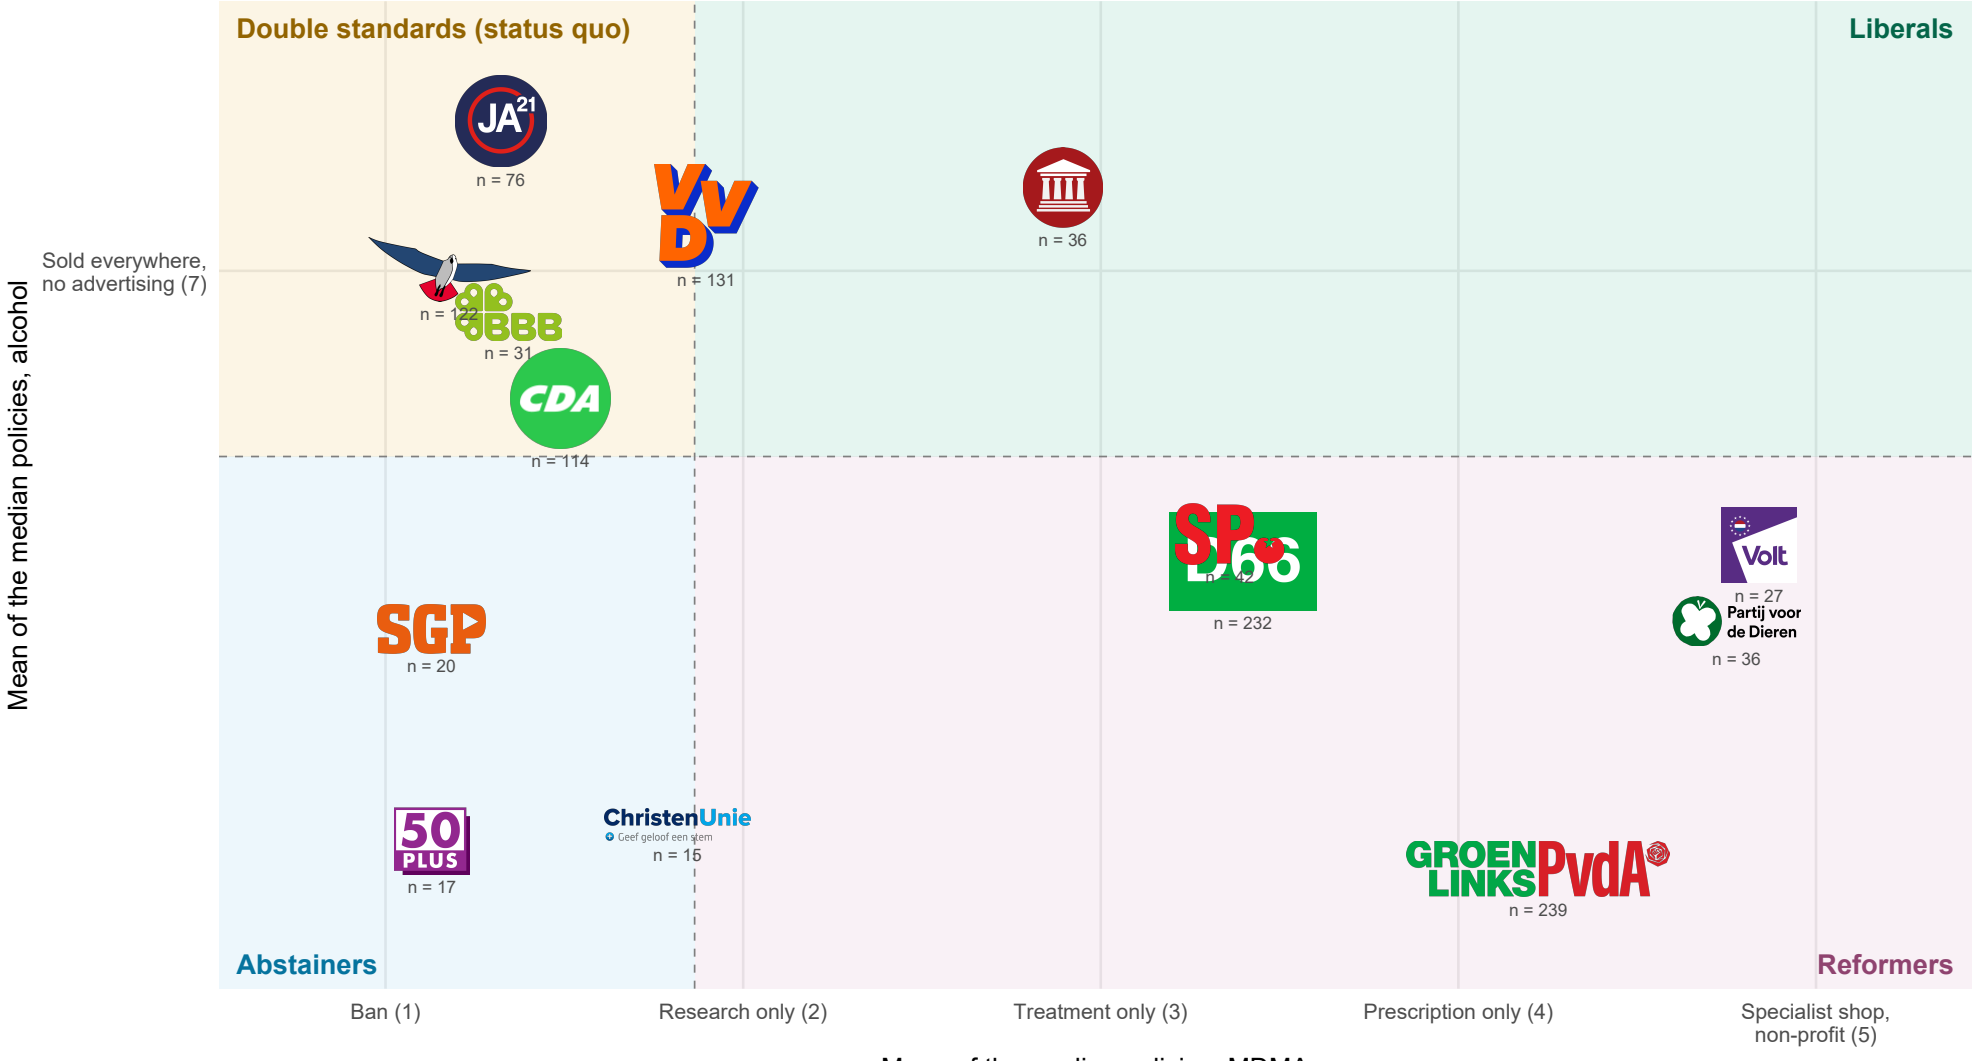

Parties by mean of the median policies: psychedelics vs alcohol

Per party and drug the weighted median answer (interpolated, grouped-data median), then the mean over the drugs of an axis.
With one drug on an axis this is the median itself.
x: psychedelics; y: alcohol. Dashed lines = mean of the per-drug medians of all answers.
Axis ranges fitted per page and per axis. Logo size reflects n.
Geen mening excluded; non-voters, blank, Anders and DENK (n = 1) left out. Vote: TK 2025.

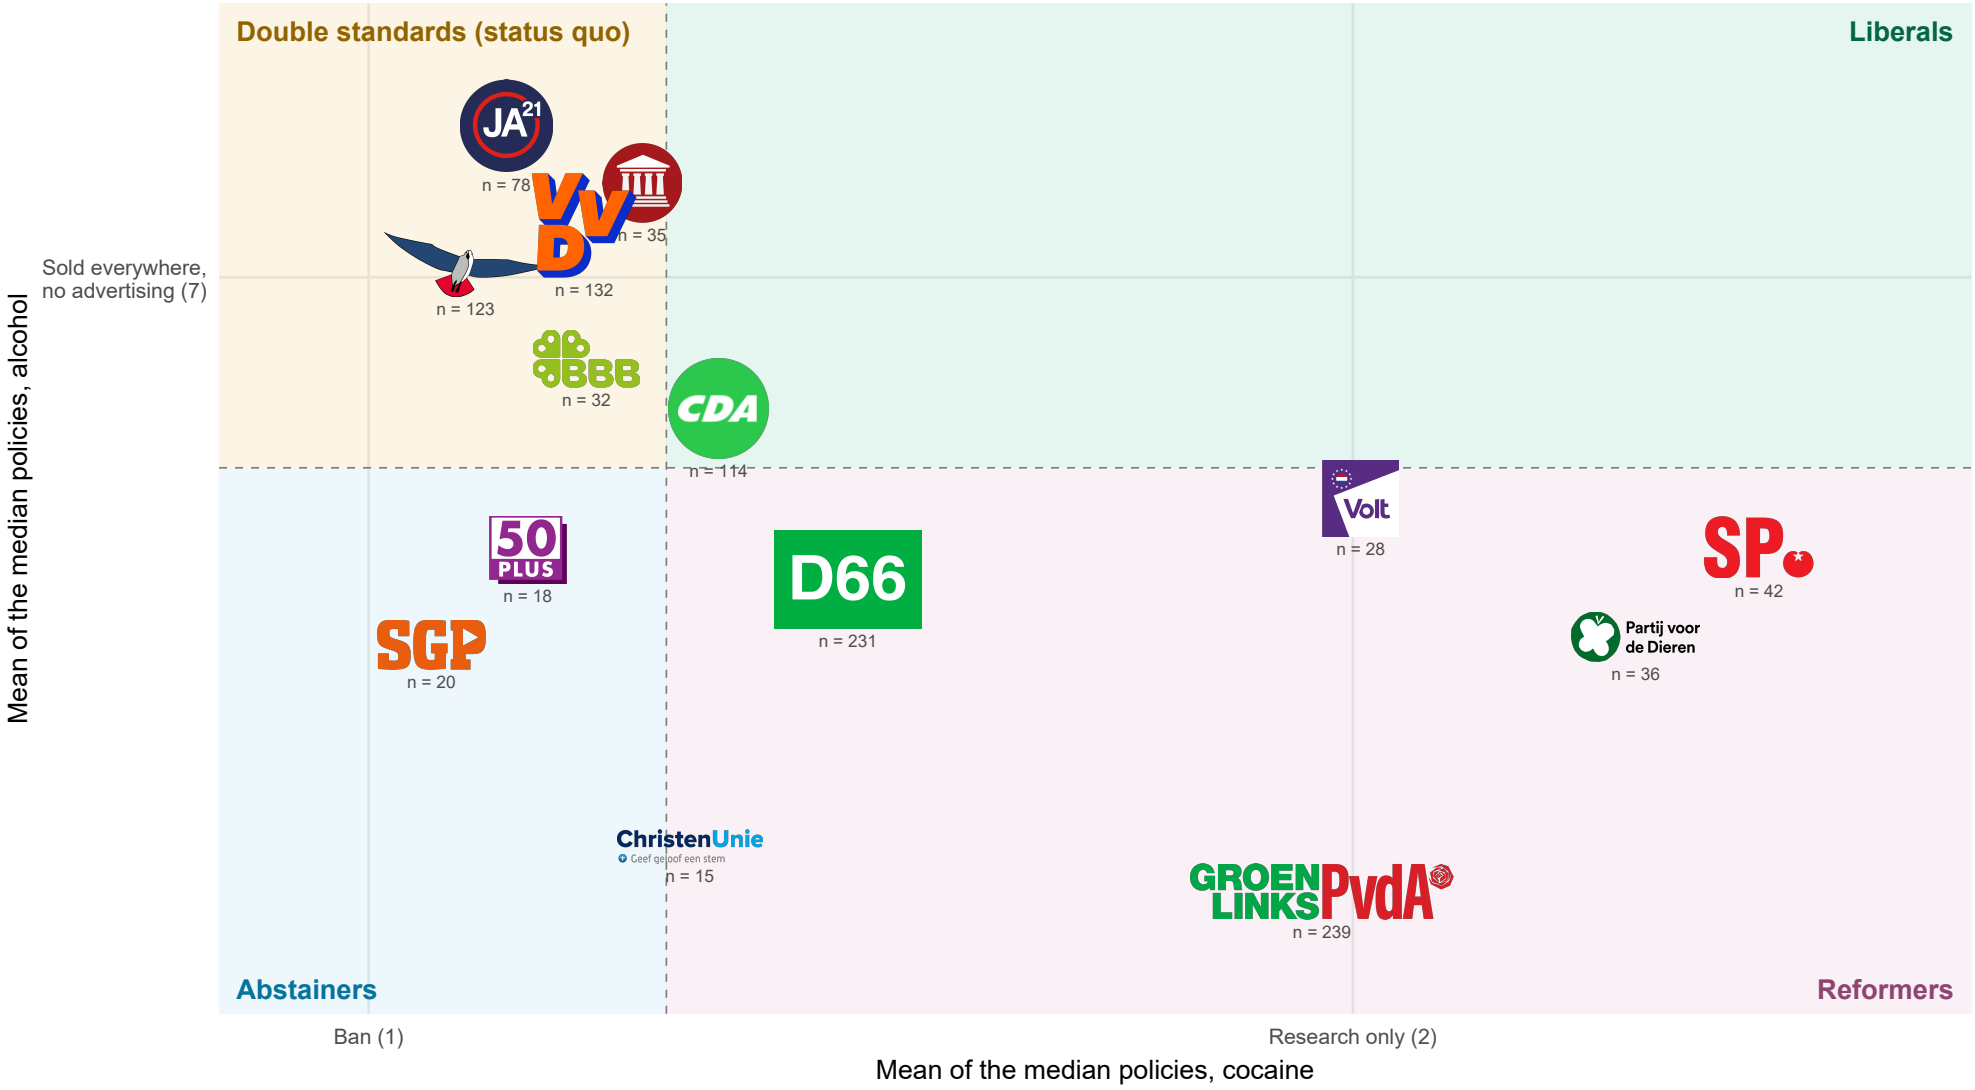

Parties by mean of the median policies: MDMA vs alcohol

Per party and drug the weighted median answer (interpolated, grouped-data median), then the mean over the drugs of an axis.
With one drug on an axis this is the median itself.
x: MDMA; y: alcohol. Dashed lines = mean of the per-drug medians of all answers.
Axis ranges fitted per page and per axis. Logo size reflects n.
Geen mening excluded; non-voters, blank, Anders and DENK (n = 1) left out. Vote: TK 2025.

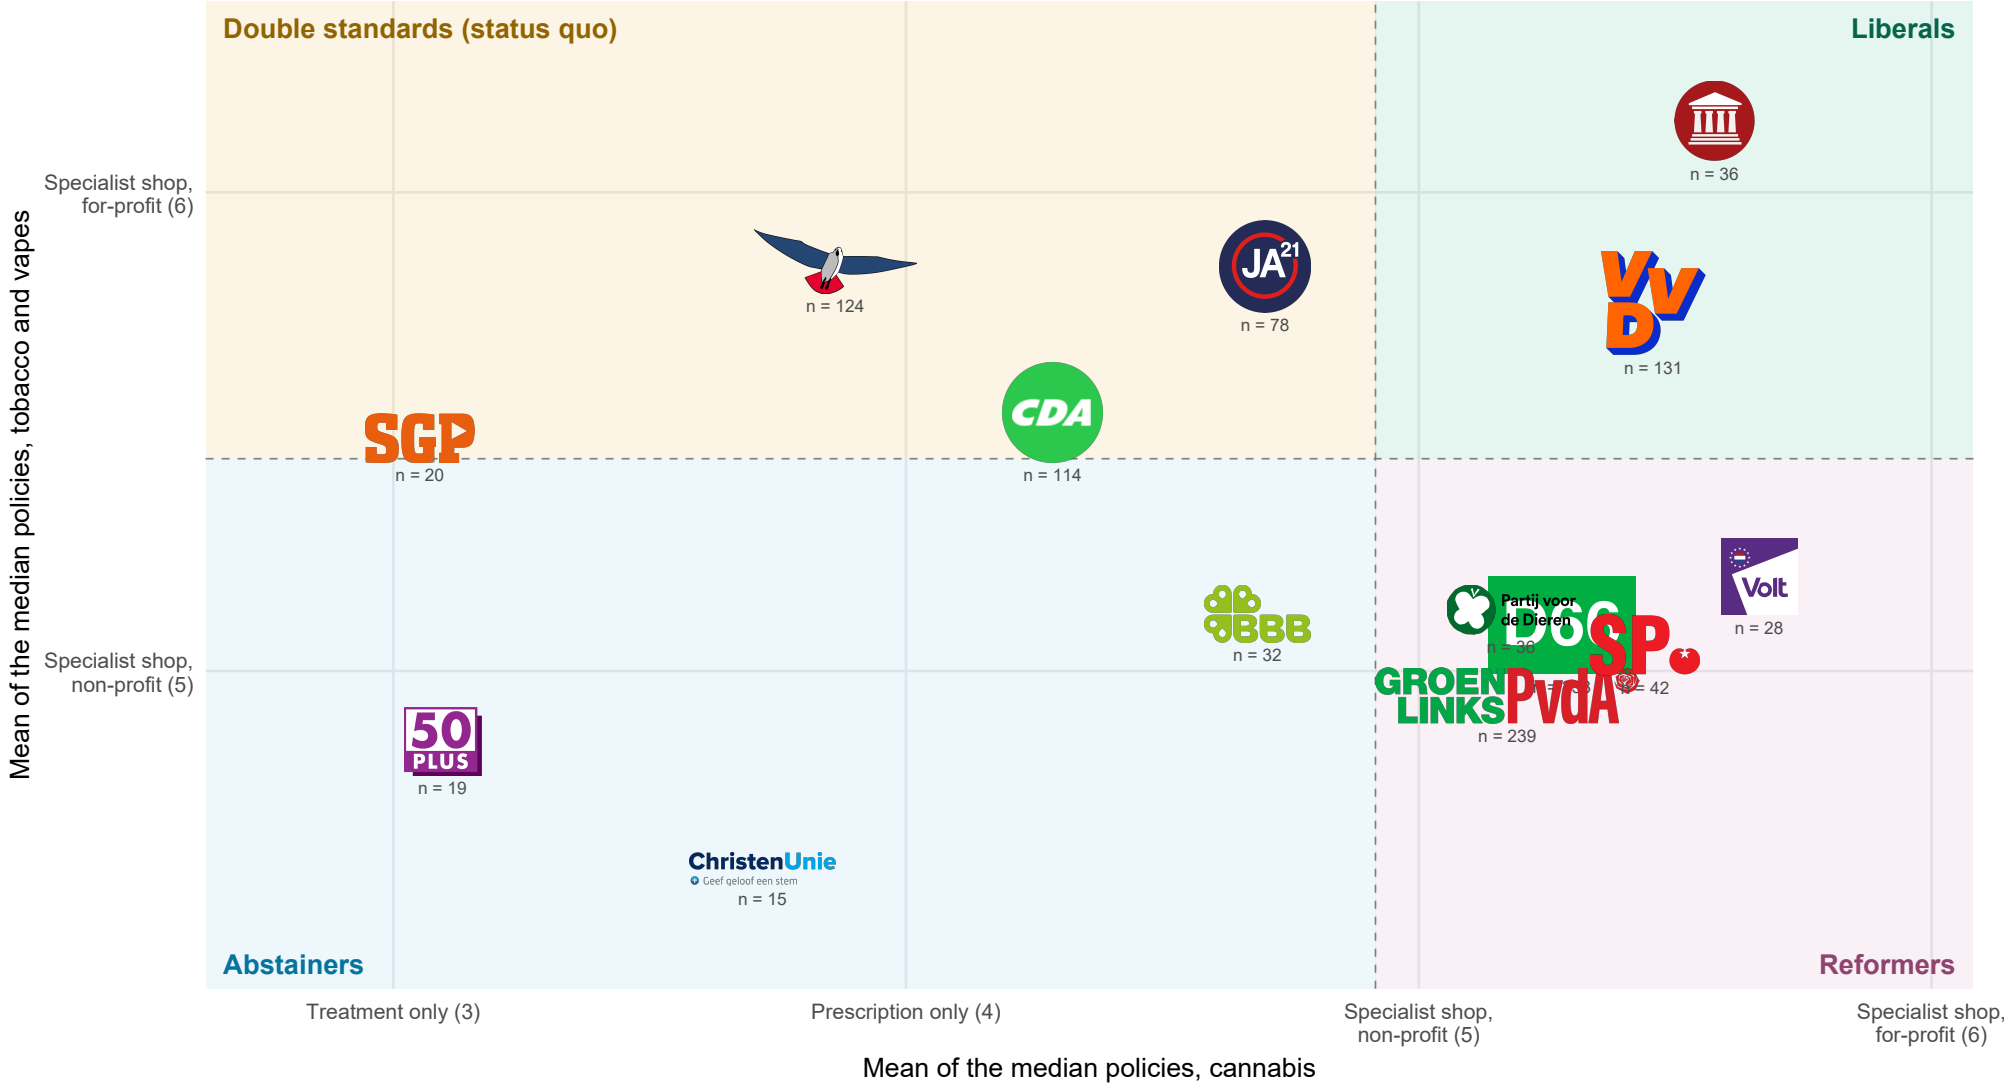

Parties by mean of the median policies: cocaine vs alcohol

Per party and drug the weighted median answer (interpolated, grouped-data median), then the mean over the drugs of an axis.
With one drug on an axis this is the median itself.
x: cocaine; y: alcohol. Dashed lines = mean of the per-drug medians of all answers.
Axis ranges fitted per page and per axis. Logo size reflects n.
Geen mening excluded; non-voters, blank, Anders and DENK (n = 1) left out. Vote: TK 2025.

Parties by mean of the median policies: cannabis vs tobacco and vapes

Per party and drug the weighted median answer (interpolated, grouped-data median), then the mean over the drugs of an axis.
With one drug on an axis this is the median itself.
x: cannabis; y: tobacco and vapes. Dashed lines = mean of the per-drug medians of all answers.
Axis ranges fitted per page and per axis. Logo size reflects n.
Geen mening excluded; non-voters, blank, Anders and DENK (n = 1) left out. Vote: TK 2025.

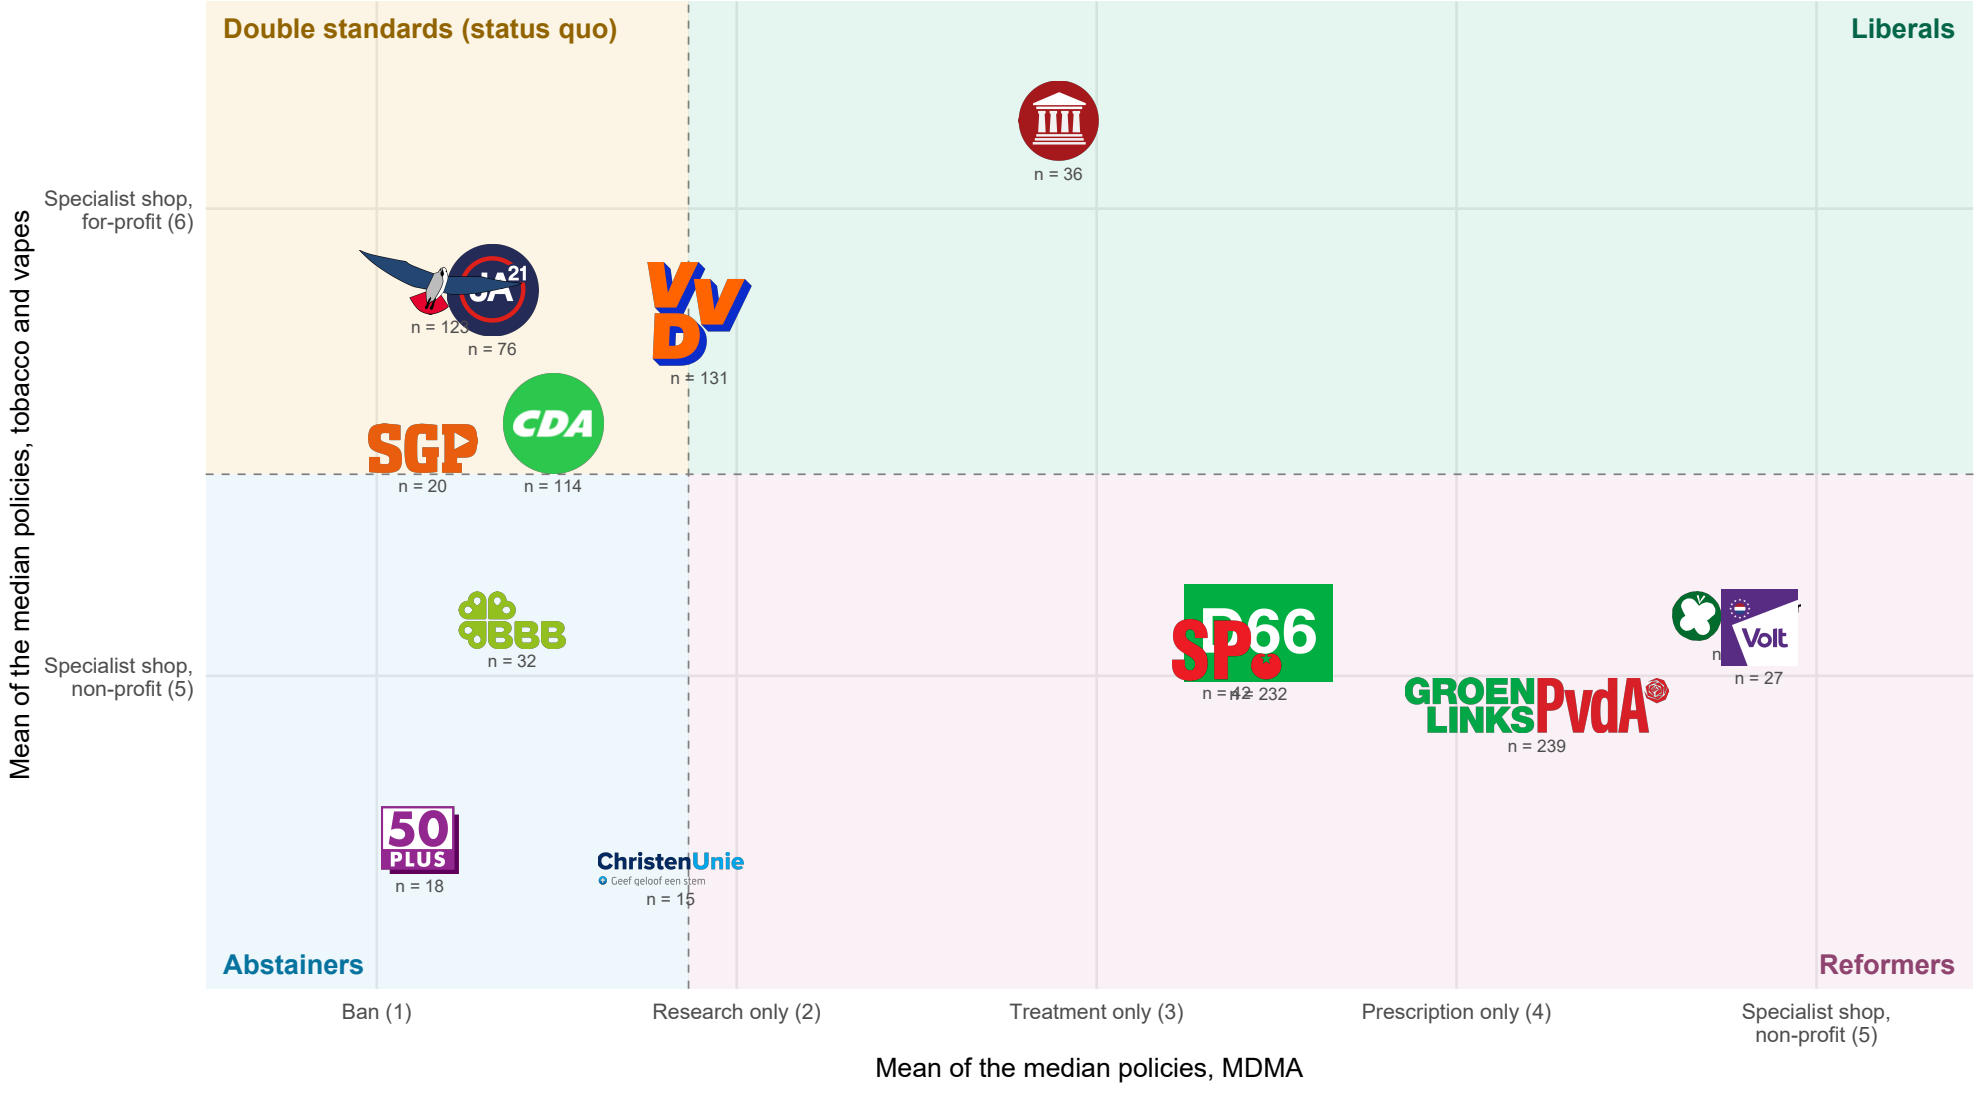

Parties by mean of the median policies: psychedelics vs tobacco and vapes

Per party and drug the weighted median answer (interpolated, grouped-data median), then the mean over the drugs of an axis.
With one drug on an axis this is the median itself.
x: psychedelics; y: tobacco and vapes. Dashed lines = mean of the per-drug medians of all answers.
Axis ranges fitted per page and per axis. Logo size reflects n.
Geen mening excluded; non-voters, blank, Anders and DENK (n = 1) left out. Vote: TK 2025.

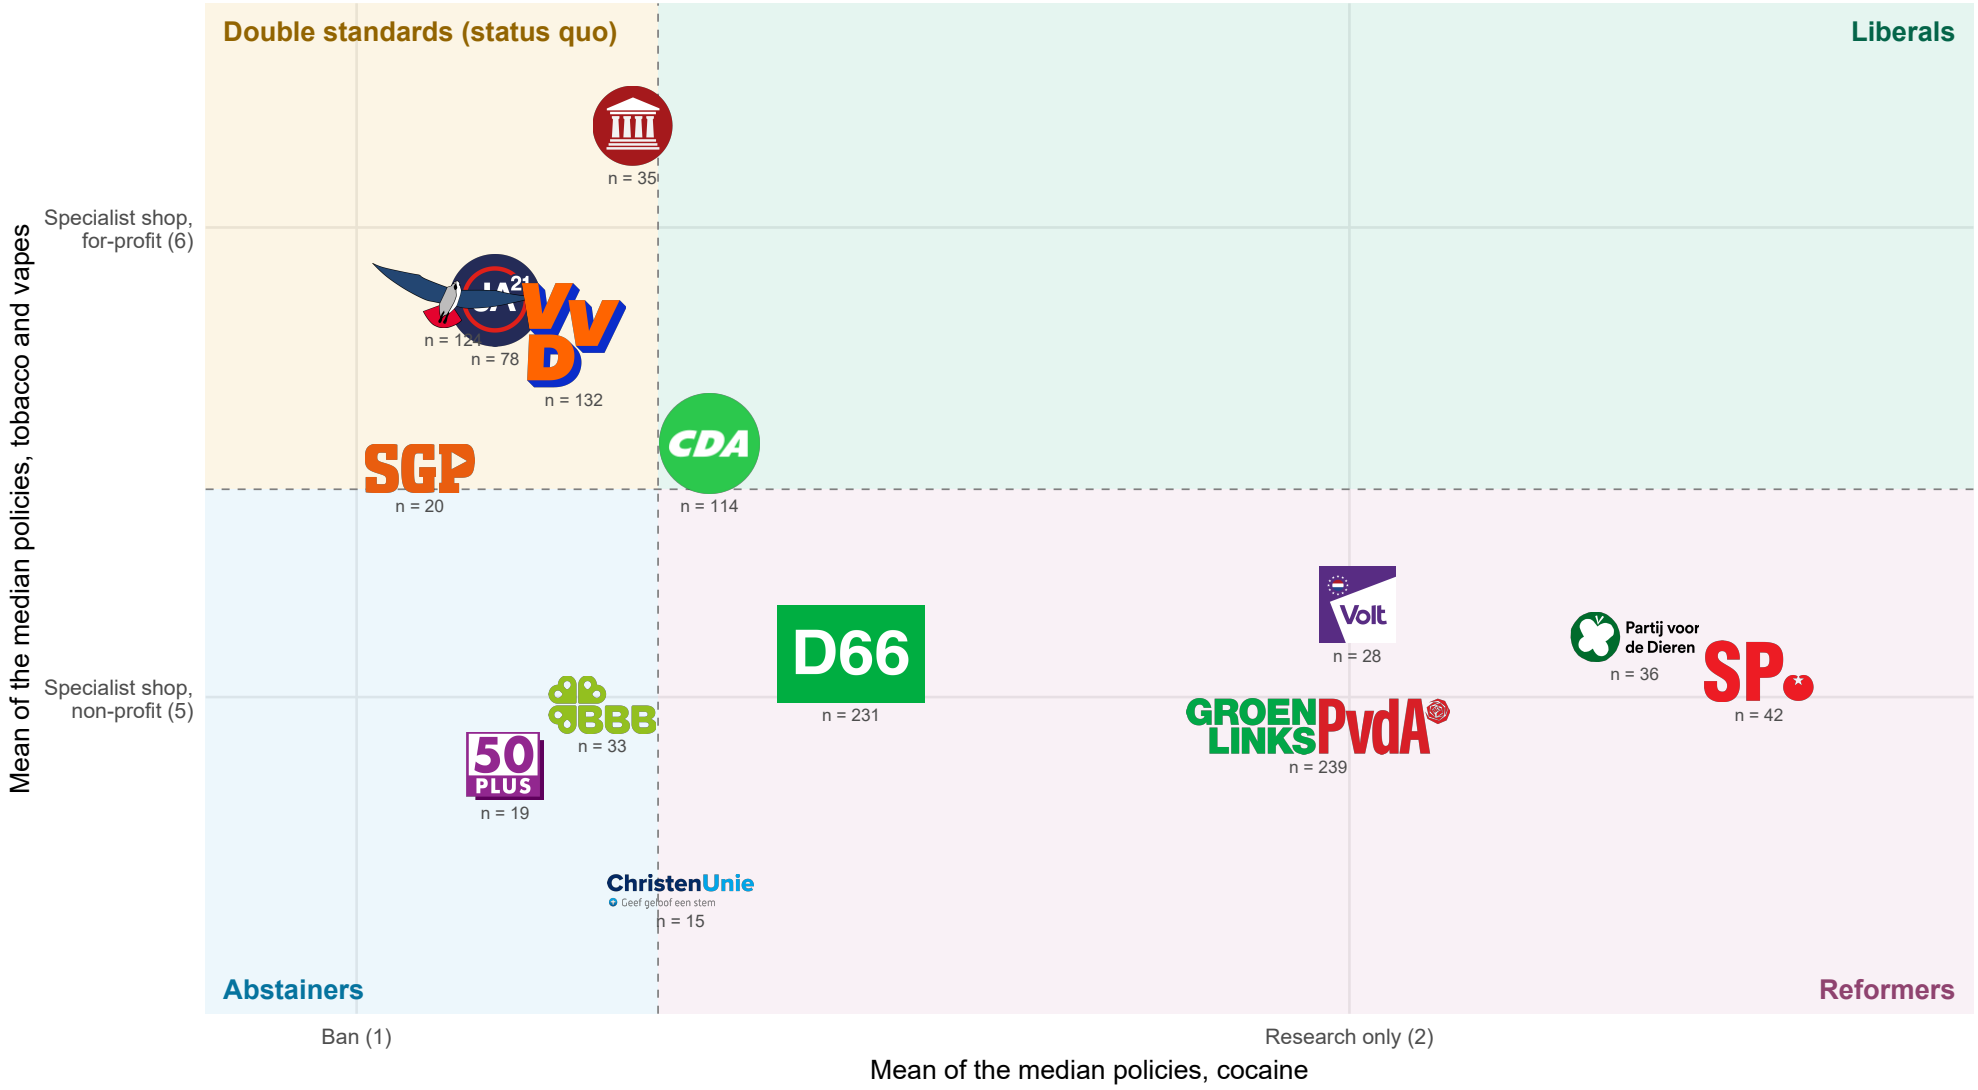

Parties by mean of the median policies: MDMA vs tobacco and vapes

Per party and drug the weighted median answer (interpolated, grouped-data median), then the mean over the drugs of an axis.
With one drug on an axis this is the median itself.
x: MDMA; y: tobacco and vapes. Dashed lines = mean of the per-drug medians of all answers.
Axis ranges fitted per page and per axis. Logo size reflects n.
Geen mening excluded; non-voters, blank, Anders and DENK (n = 1) left out. Vote: TK 2025.

Parties by mean of the median policies: cocaine vs tobacco and vapes

Per party and drug the weighted median answer (interpolated, grouped-data median), then the mean over the drugs of an axis.
With one drug on an axis this is the median itself.
x: cocaine; y: tobacco and vapes. Dashed lines = mean of the per-drug medians of all answers.
Axis ranges fitted per page and per axis. Logo size reflects n.
Geen mening excluded; non-voters, blank, Anders and DENK (n = 1) left out. Vote: TK 2025.

Parties by mean of the median policies: psychedelics vs cannabis

Per party and drug the weighted median answer (interpolated, grouped-data median), then the mean over the drugs of an axis.
With one drug on an axis this is the median itself.
x: psychedelics; y: cannabis. Dashed lines = mean of the per-drug medians of all answers.
Axis ranges fitted per page and per axis. Logo size reflects n.
Geen mening excluded; non-voters, blank, Anders and DENK (n = 1) left out. Vote: TK 2025.

Parties by mean of the median policies: MDMA vs cannabis

Per party and drug the weighted median answer (interpolated, grouped-data median), then the mean over the drugs of an axis.
With one drug on an axis this is the median itself.
x: MDMA; y: cannabis. Dashed lines = mean of the per-drug medians of all answers.
Axis ranges fitted per page and per axis. Logo size reflects n.
Geen mening excluded; non-voters, blank, Anders and DENK (n = 1) left out. Vote: TK 2025.

Parties by mean of the median policies: cocaine vs cannabis

Per party and drug the weighted median answer (interpolated, grouped-data median), then the mean over the drugs of an axis.
With one drug on an axis this is the median itself.
x: cocaine; y: cannabis. Dashed lines = mean of the per-drug medians of all answers.
Axis ranges fitted per page and per axis. Logo size reflects n.
Geen mening excluded; non-voters, blank, Anders and DENK (n = 1) left out. Vote: TK 2025.
