Parties by mean of the most chosen policies: illicit drugs, with cannabis vs alcohol and tobacco

Per party and drug the most chosen answer (weighted), then the mean over the drugs of an axis. With one drug on an axis this is the most chosen answer itself; parties with the same values are spread within the cell.
x: cannabis, psychedelics, MDMA, cocaine, speed, heroin; y: alcohol, tobacco and vapes. Dashed lines = mean of the per-drug medians of all answers.
Axis ranges fitted per page and per axis. Logo size reflects n.
Geen mening excluded; non-voters, blank, Anders and DENK (n = 1) left out. Vote: TK 2025.

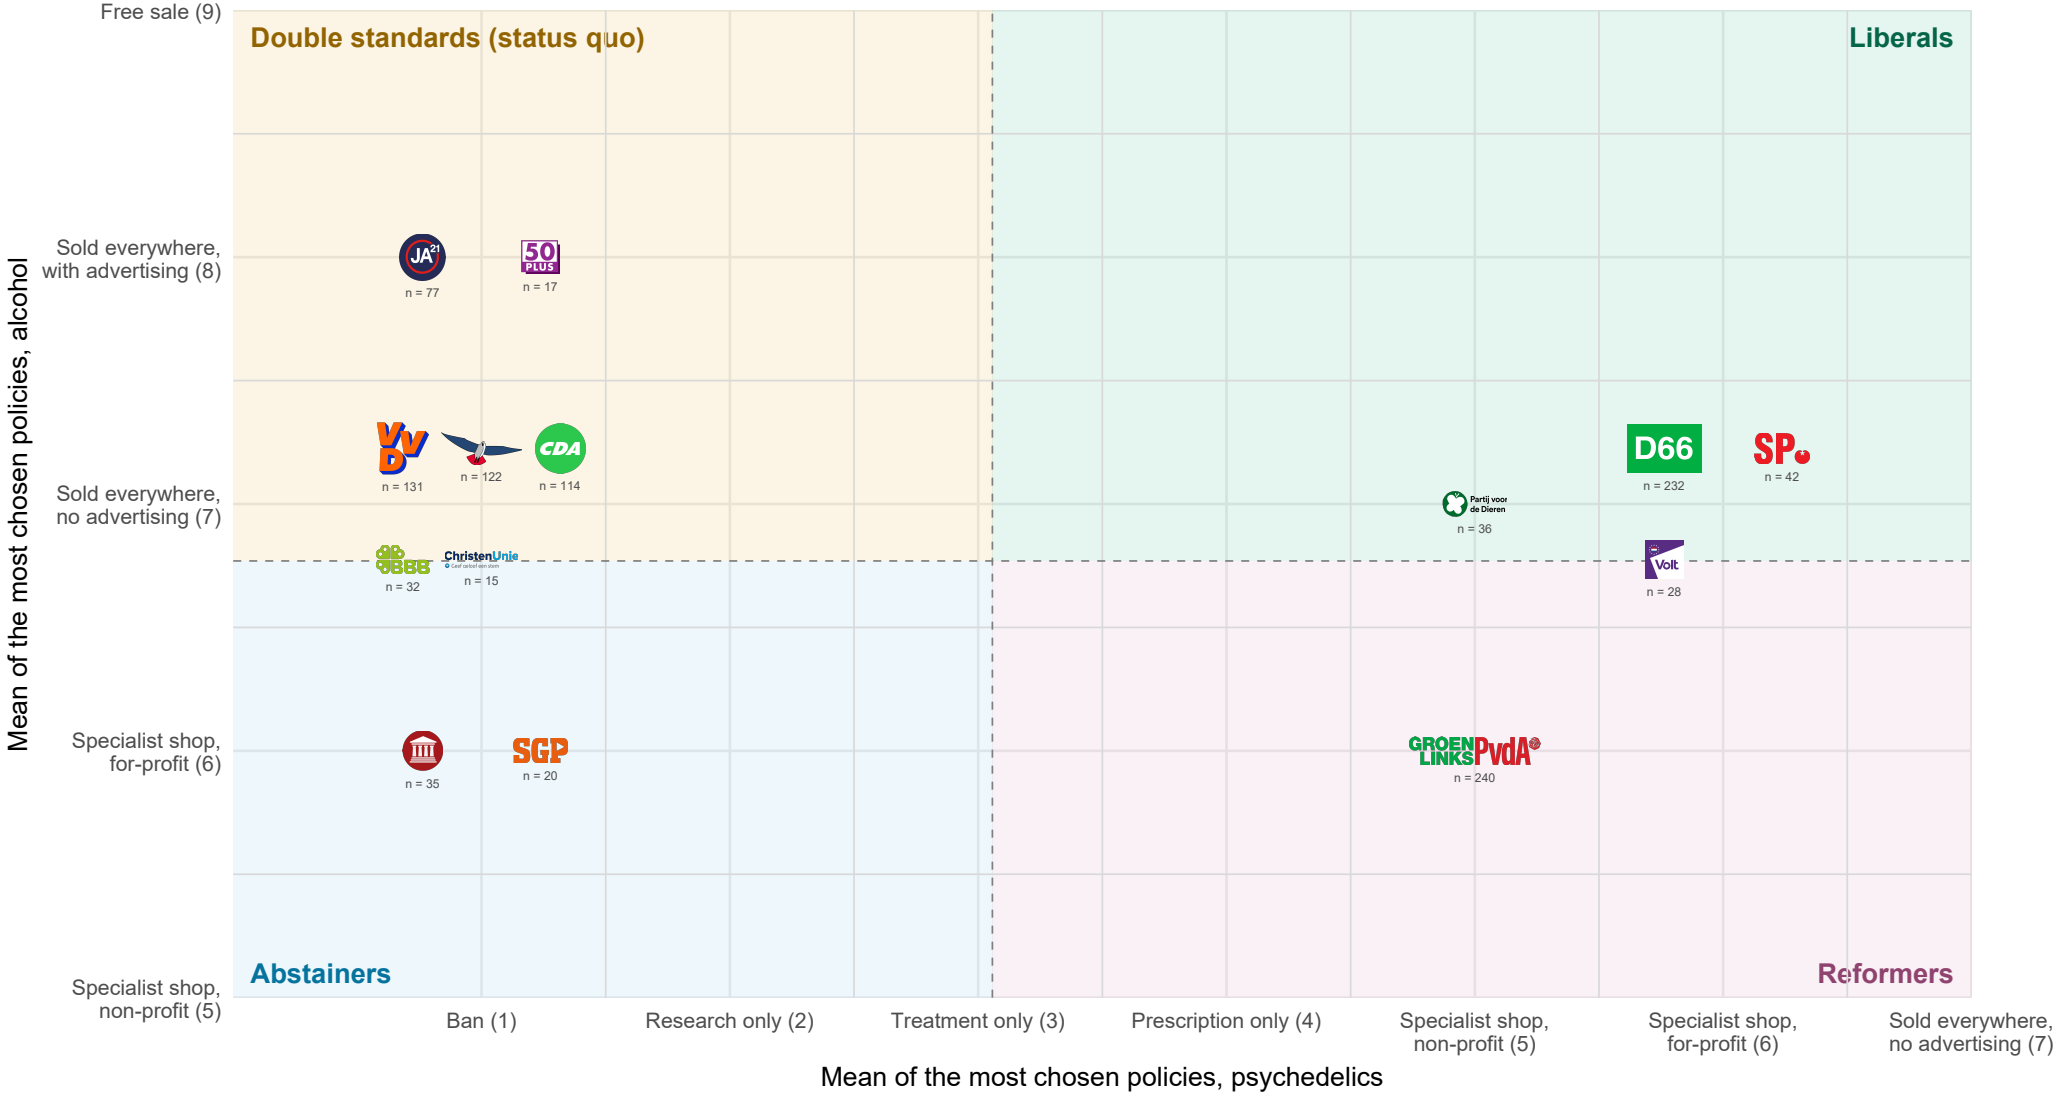

Parties by mean of the most chosen policies: cannabis vs alcohol

Per party and drug the most chosen answer (weighted), then the mean over the drugs of an axis. With one drug on an axis this is the most chosen answer itself; parties with the same values are spread within the cell.
x: cannabis; y: alcohol. Dashed lines = mean of the per-drug medians of all answers.
Axis ranges fitted per page and per axis. Logo size reflects n.
Geen mening excluded; non-voters, blank, Anders and DENK (n = 1) left out. Vote: TK 2025.

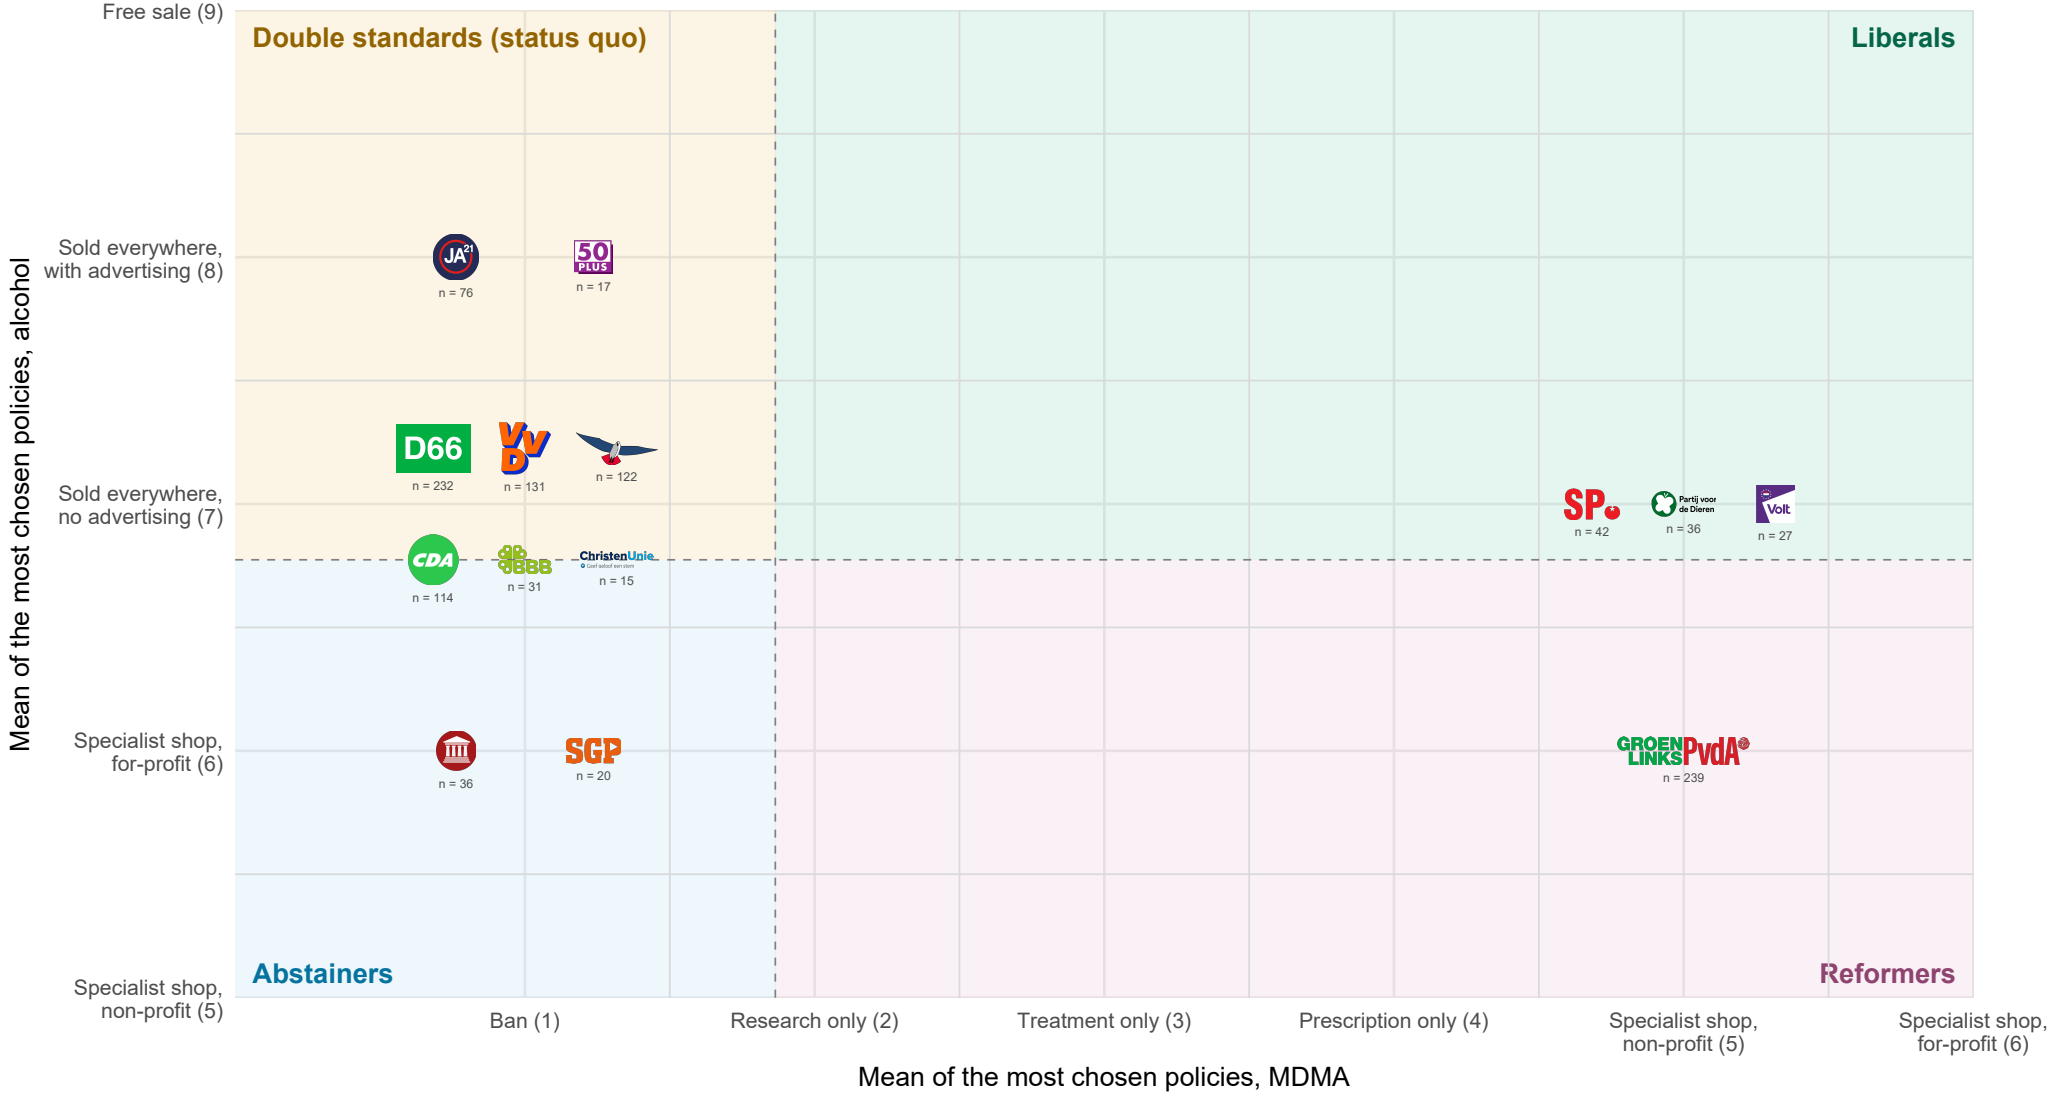

Parties by mean of the most chosen policies: psychedelics vs alcohol

Per party and drug the most chosen answer (weighted), then the mean over the drugs of an axis. With one drug on an axis this is the most chosen answer itself; parties with the same values are spread within the cell.
x: psychedelics; y: alcohol. Dashed lines = mean of the per-drug medians of all answers.
Axis ranges fitted per page and per axis. Logo size reflects n.
Geen mening excluded; non-voters, blank, Anders and DENK (n = 1) left out. Vote: TK 2025.

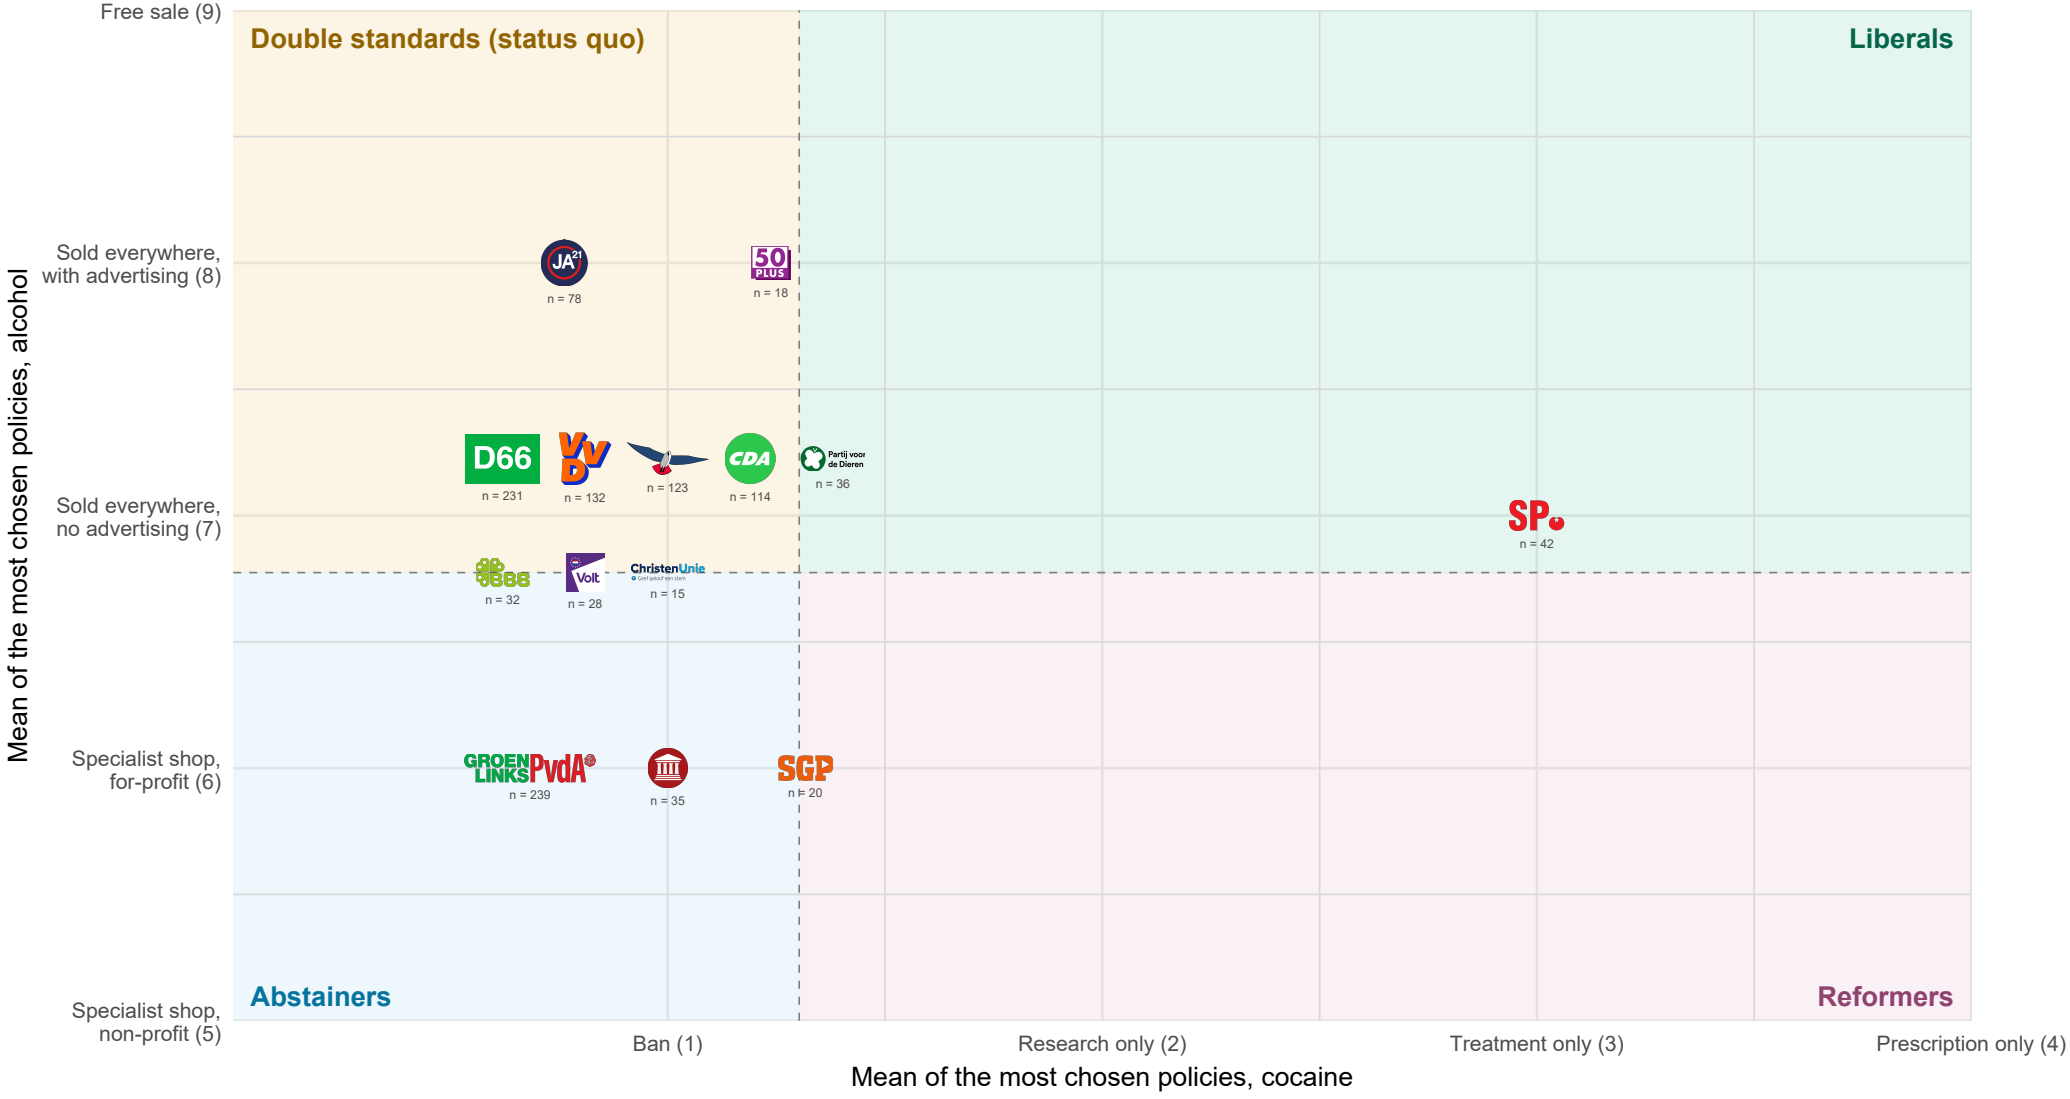

Parties by mean of the most chosen policies: MDMA vs alcohol

Per party and drug the most chosen answer (weighted), then the mean over the drugs of an axis. With one drug on an axis this is the most chosen answer itself; parties with the same values are spread within the cell.
x: MDMA; y: alcohol. Dashed lines = mean of the per-drug medians of all answers.
Axis ranges fitted per page and per axis. Logo size reflects n.
Geen mening excluded; non-voters, blank, Anders and DENK (n = 1) left out. Vote: TK 2025.

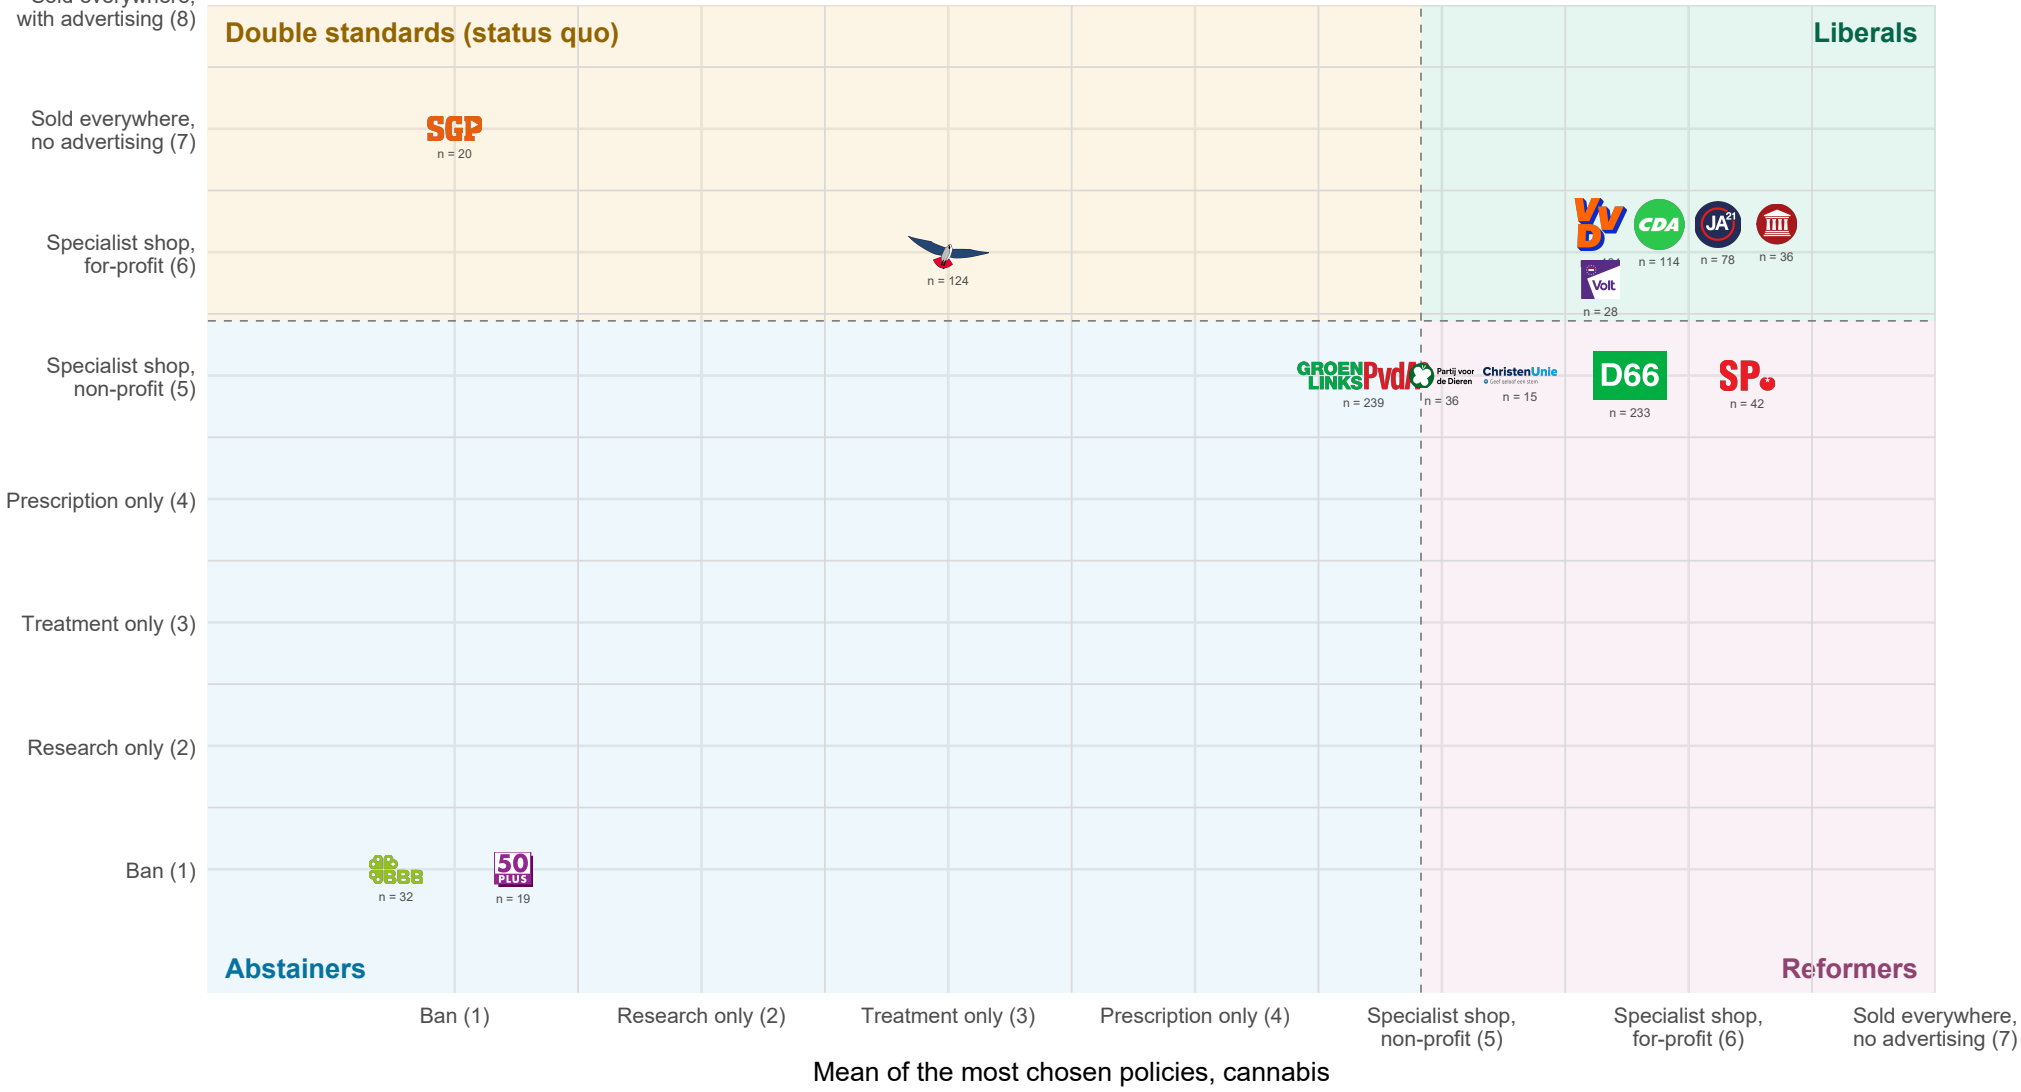

Parties by mean of the most chosen policies: cocaine vs alcohol

Per party and drug the most chosen answer (weighted), then the mean over the drugs of an axis. With one drug on an axis this is the most chosen answer itself; parties with the same values are spread within the cell.
x: cocaine; y: alcohol. Dashed lines = mean of the per-drug medians of all answers.
Axis ranges fitted per page and per axis. Logo size reflects n.
Geen mening excluded; non-voters, blank, Anders and DENK (n = 1) left out. Vote: TK 2025.

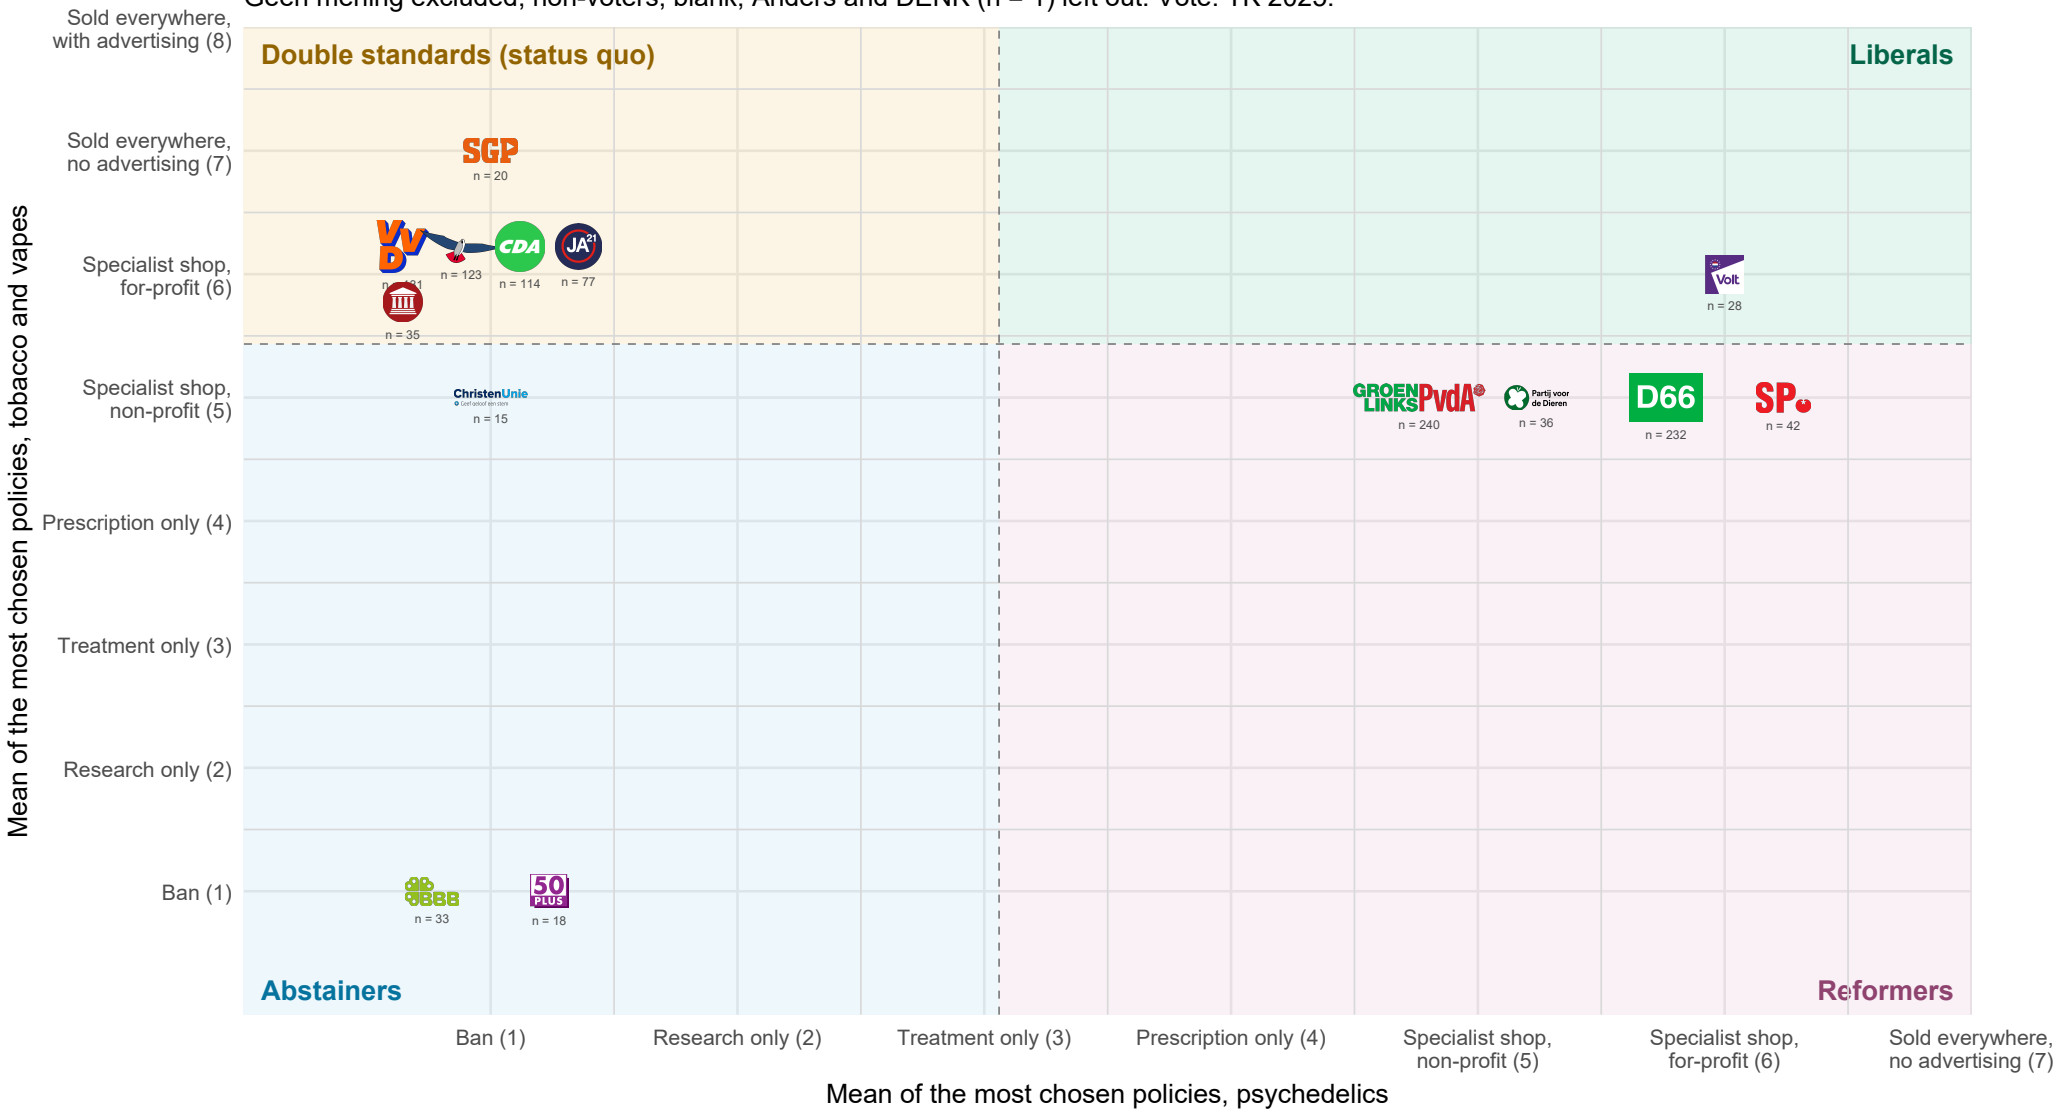

Parties by mean of the most chosen policies: cannabis vs tobacco and vapes

Per party and drug the most chosen answer (weighted), then the mean over the drugs of an axis. With one drug on an axis this is the most chosen answer itself; parties with the same values are spread within the cell.
x: cannabis; y: tobacco and vapes. Dashed lines = mean of the per-drug medians of all answers.
Axis ranges fitted per page and per axis. Logo size reflects n.
Geen mening excluded; non-voters, blank, Anders and DENK (n = 1) left out. Vote: TK 2025.

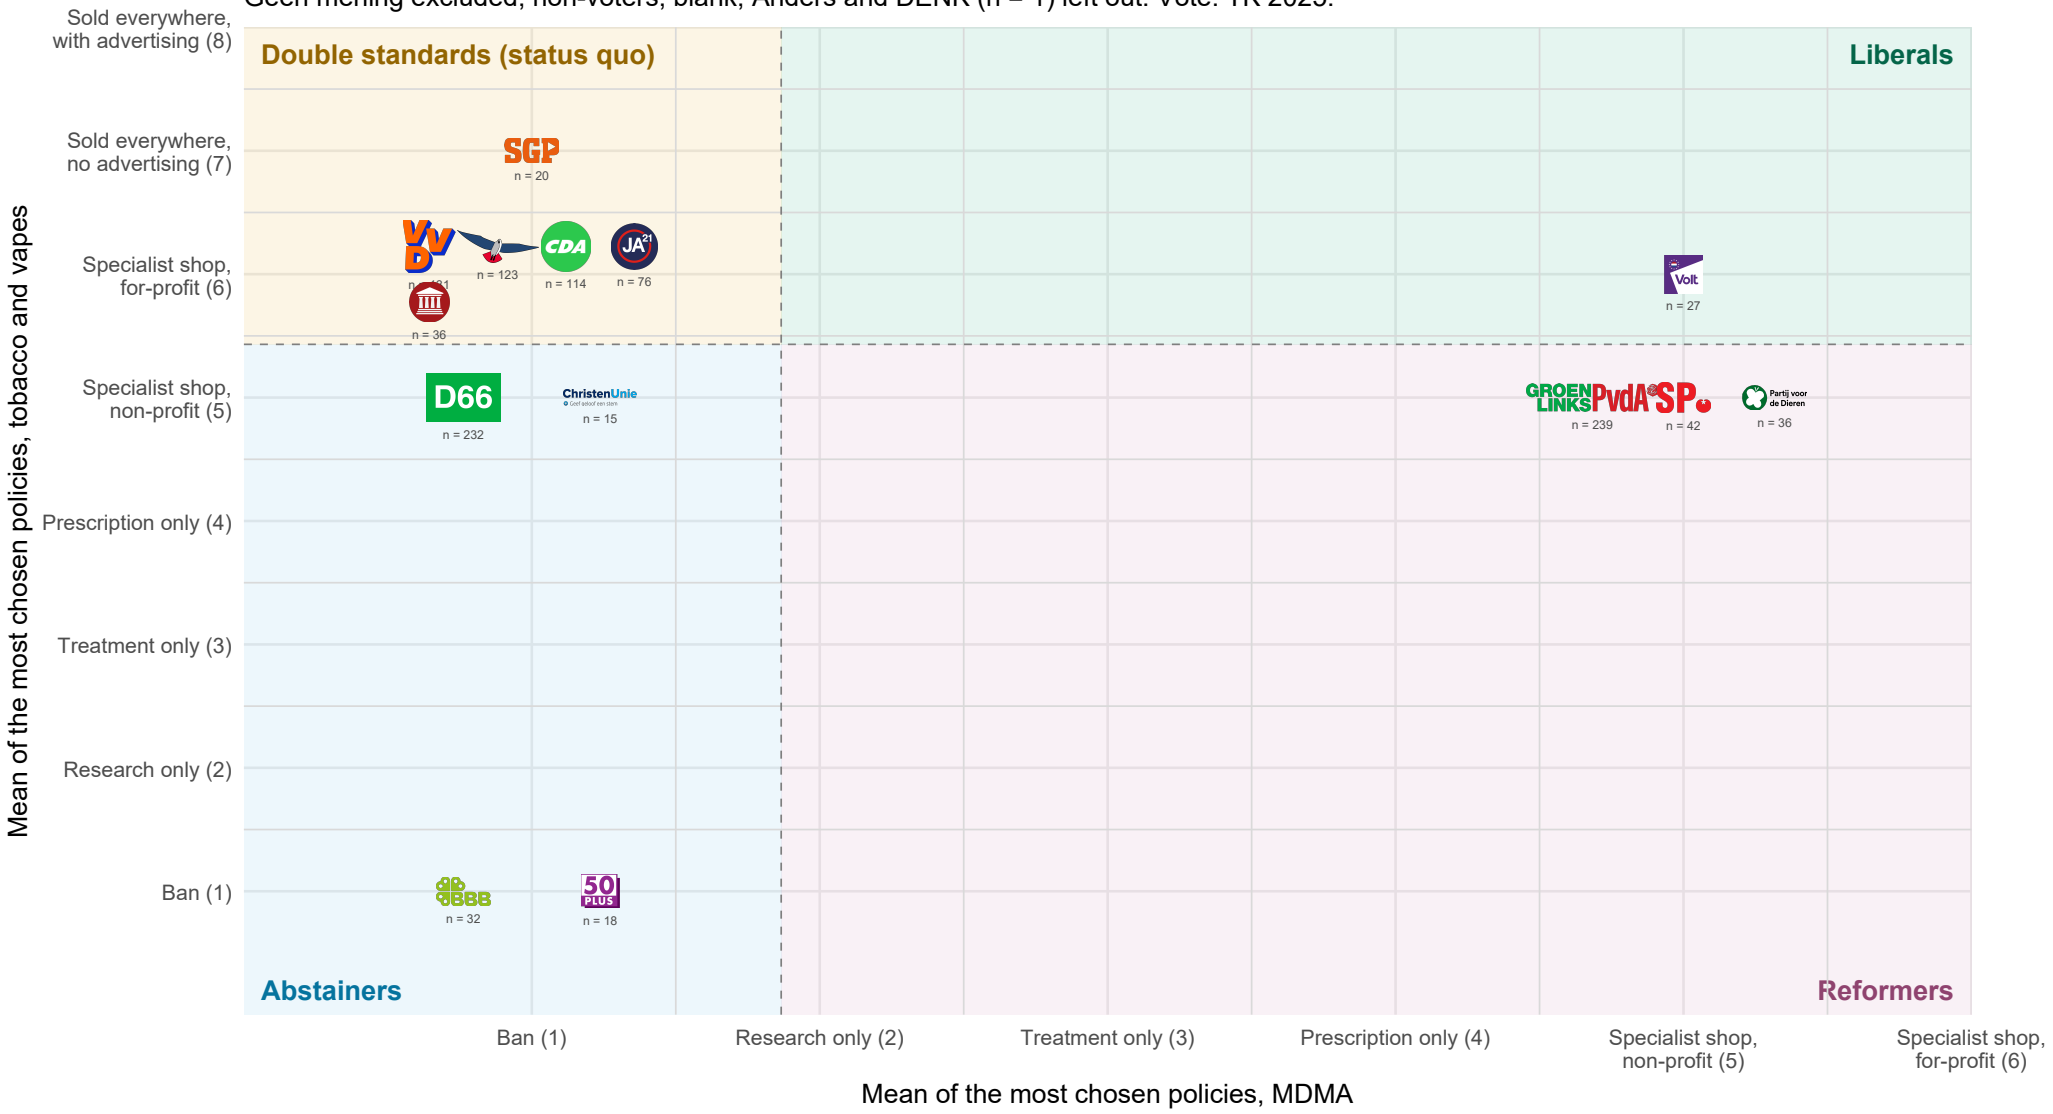

Parties by mean of the most chosen policies: psychedelics vs tobacco and vapes

Per party and drug the most chosen answer (weighted), then the mean over the drugs of an axis. With one drug on an axis this is the most chosen answer itself; parties with the same values are spread within the cell.
x: psychedelics; y: tobacco and vapes. Dashed lines = mean of the per-drug medians of all answers.
