Party camps: cannabis (x) vs alcohol (y)

Per drug the local maxima marked by hand whose camp holds ≥ 10% of the party; each respondent belongs to the nearest one on both drugs.
A joint camp (logo) = an x and a y maximum together holding ≥ 10% of the party, at the weighted mean answers of its respondents. Grey dot = party mean, dotted lines to its camps. Logo size and n = respondents per camp. Dashed lines = sample means.
Camps per party: 1 (1 parties), 2 (7 parties), 3 (6 parties).

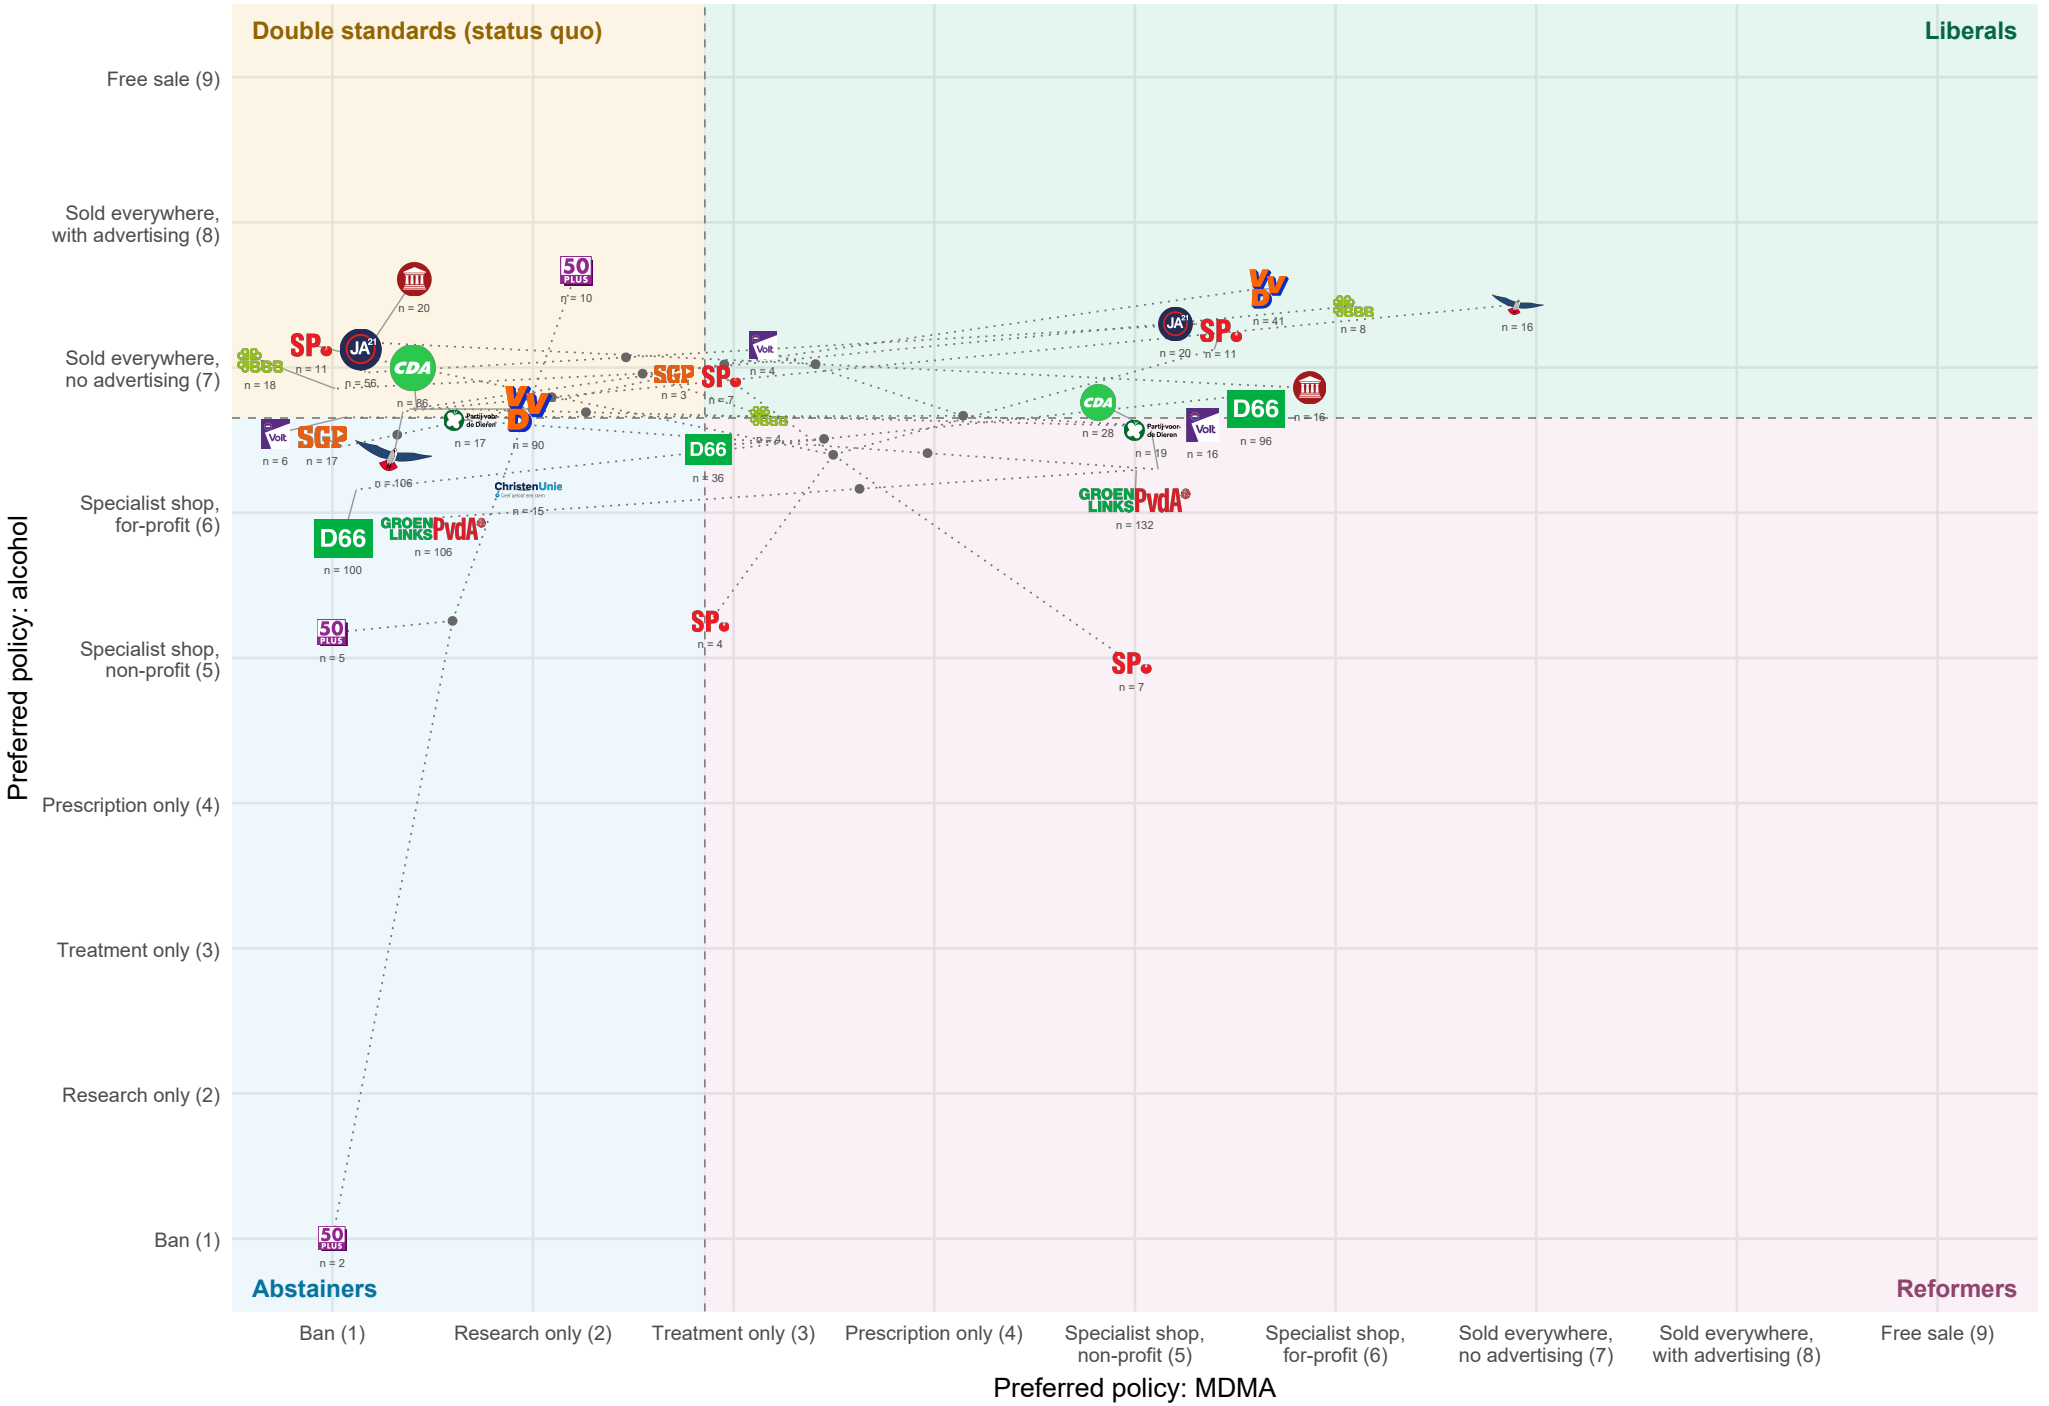

Party camps: psychedelics (x) vs alcohol (y)

Per drug the local maxima marked by hand whose camp holds ≥ 10% of the party; each respondent belongs to the nearest one on both drugs.
A joint camp (logo) = an x and a y maximum together holding ≥ 10% of the party, at the weighted mean answers of its respondents. Grey dot = party mean, dotted lines to its camps. Logo size and n = respondents per camp. Dashed lines = sample means.
Camps per party: 1 (1 parties), 2 (9 parties), 3 (2 parties), 4 (2 parties).

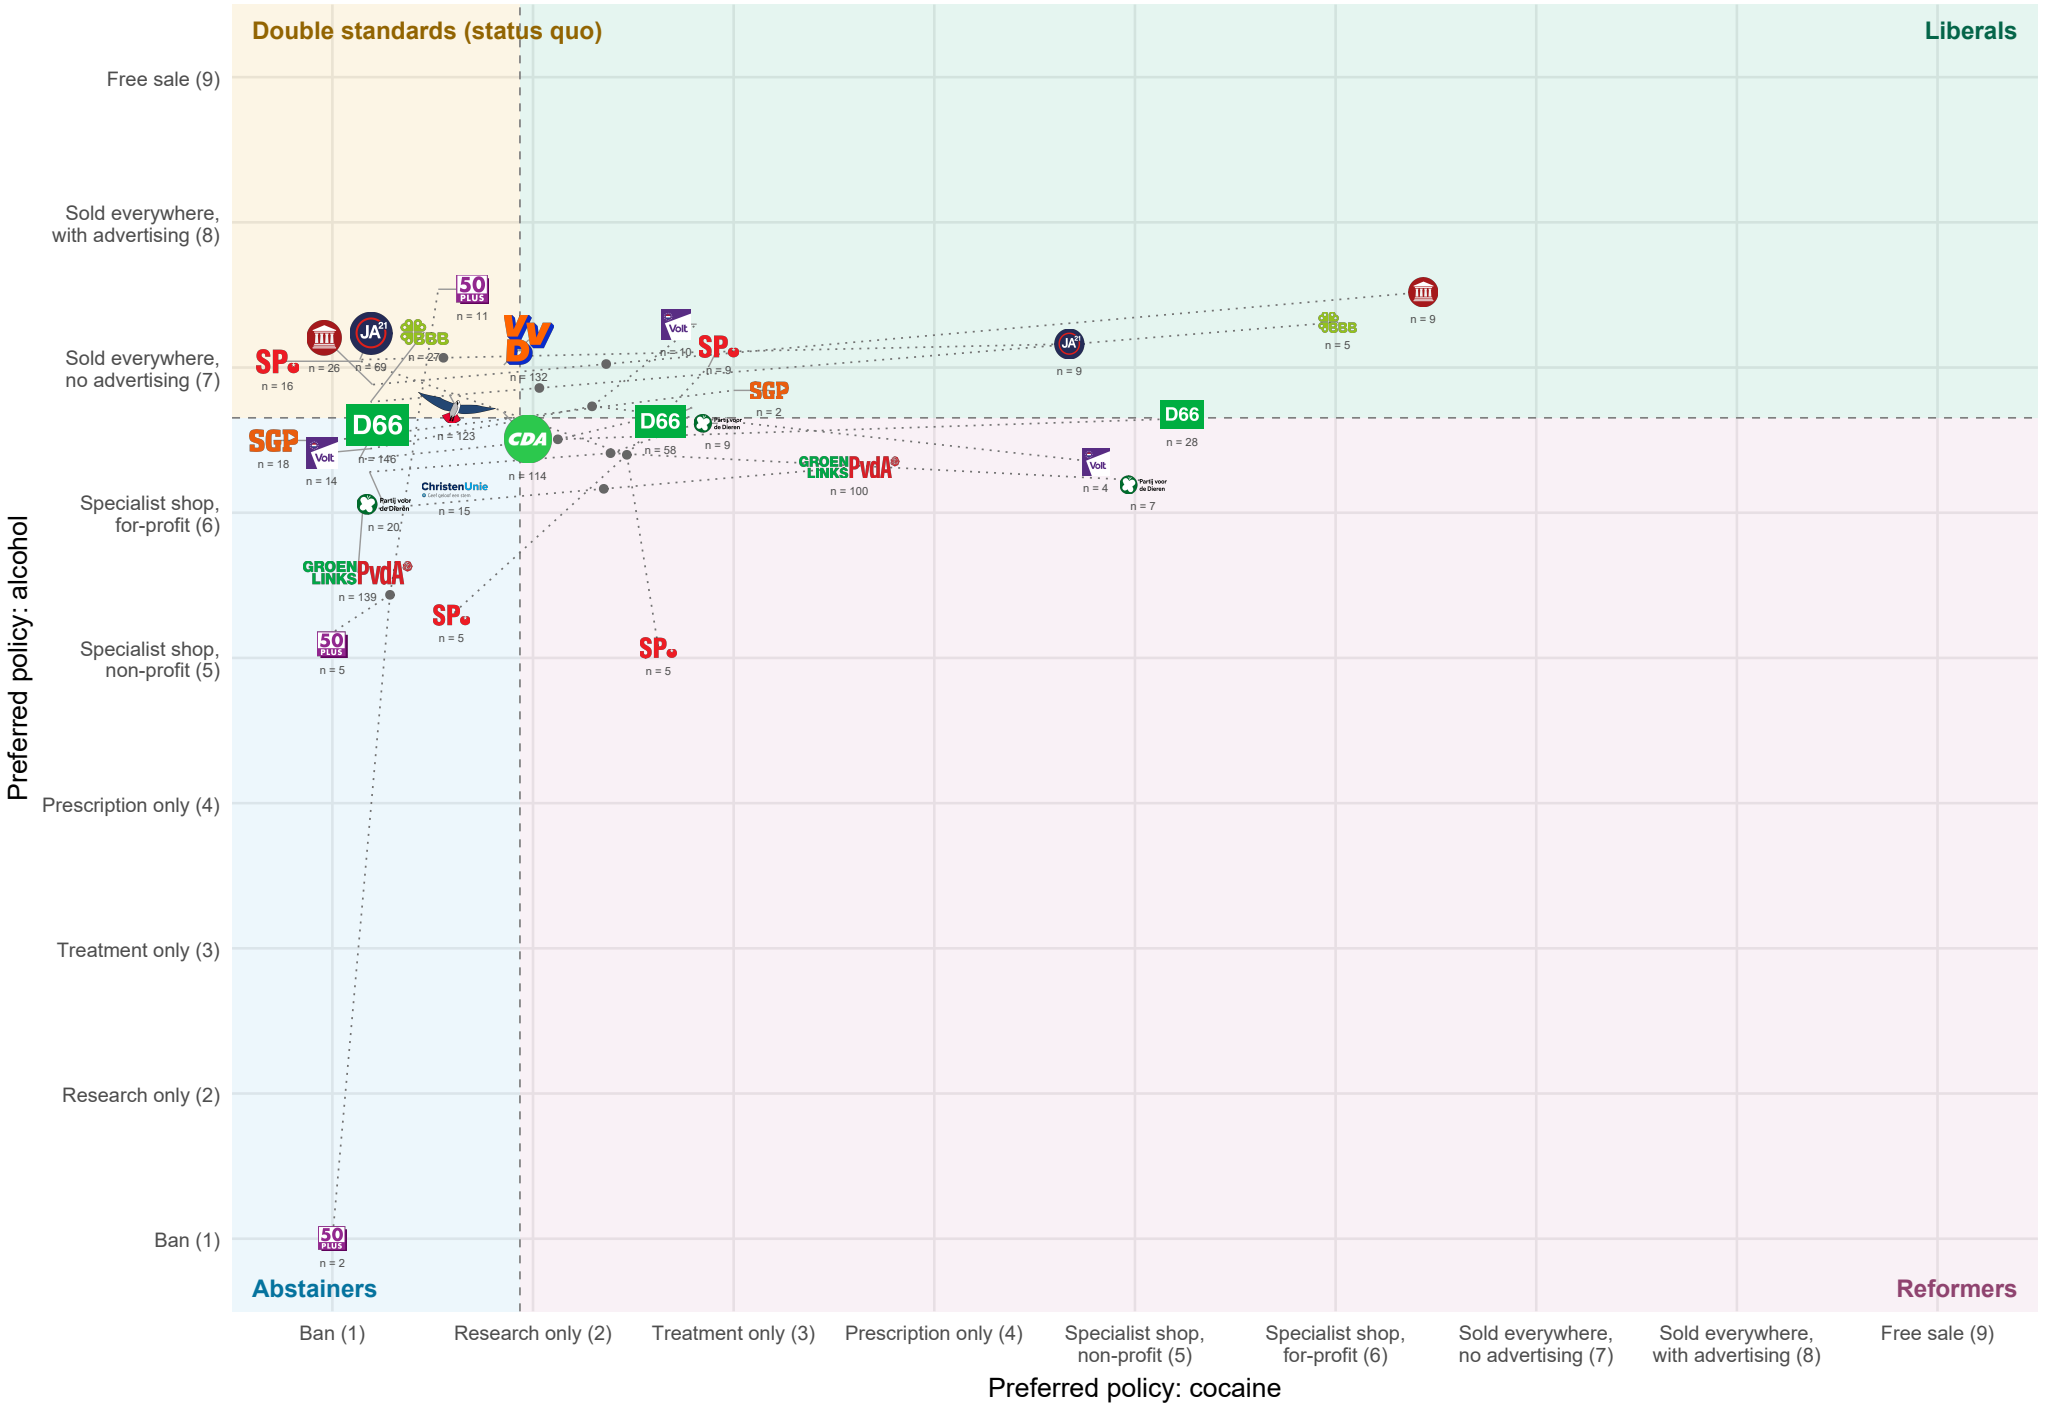

Party camps: MDMA (x) vs alcohol (y)

Per drug the local maxima marked by hand whose camp holds ≥ 10% of the party; each respondent belongs to the nearest one on both drugs.
A joint camp (logo) = an x and a y maximum together holding ≥ 10% of the party, at the weighted mean answers of its respondents. Grey dot = party mean, dotted lines to its camps. Logo size and n = respondents per camp. Dashed lines = sample means.
Camps per party: 1 (1 parties), 2 (8 parties), 3 (4 parties), 5 (1 parties).

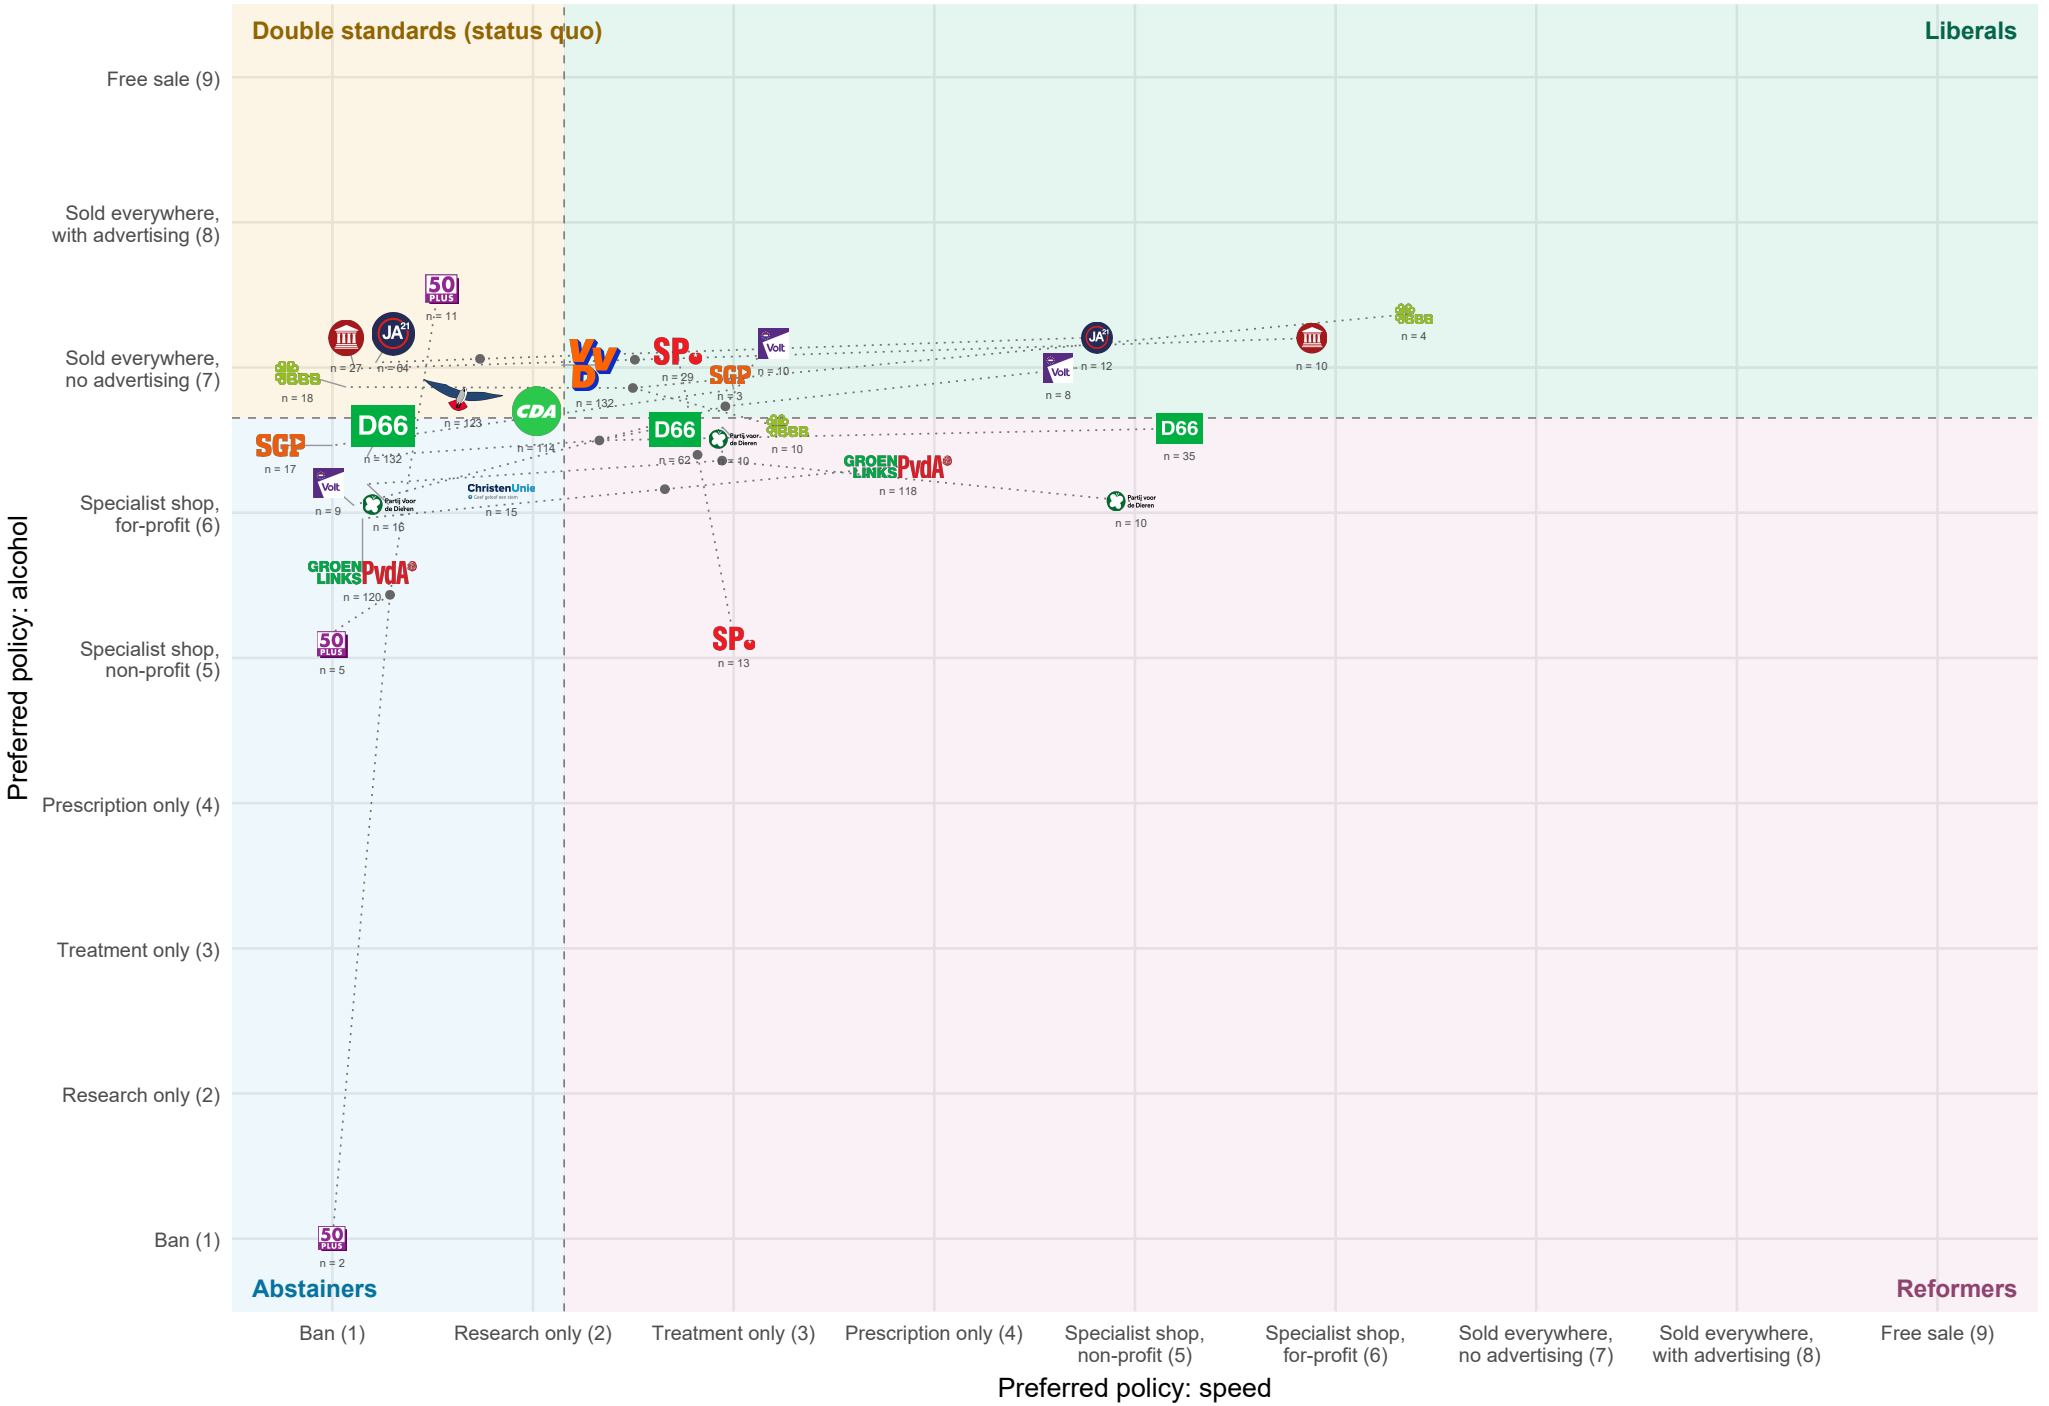

Party camps: cocaine (x) vs alcohol (y)

Per drug the local maxima marked by hand whose camp holds ≥ 10% of the party; each respondent belongs to the nearest one on both drugs.
A joint camp (logo) = an x and a y maximum together holding ≥ 10% of the party, at the weighted mean answers of its respondents. Grey dot = party mean, dotted lines to its camps. Logo size and n = respondents per camp. Dashed lines = sample means.
Camps per party: 1 (4 parties), 2 (5 parties), 3 (4 parties), 4 (1 parties).

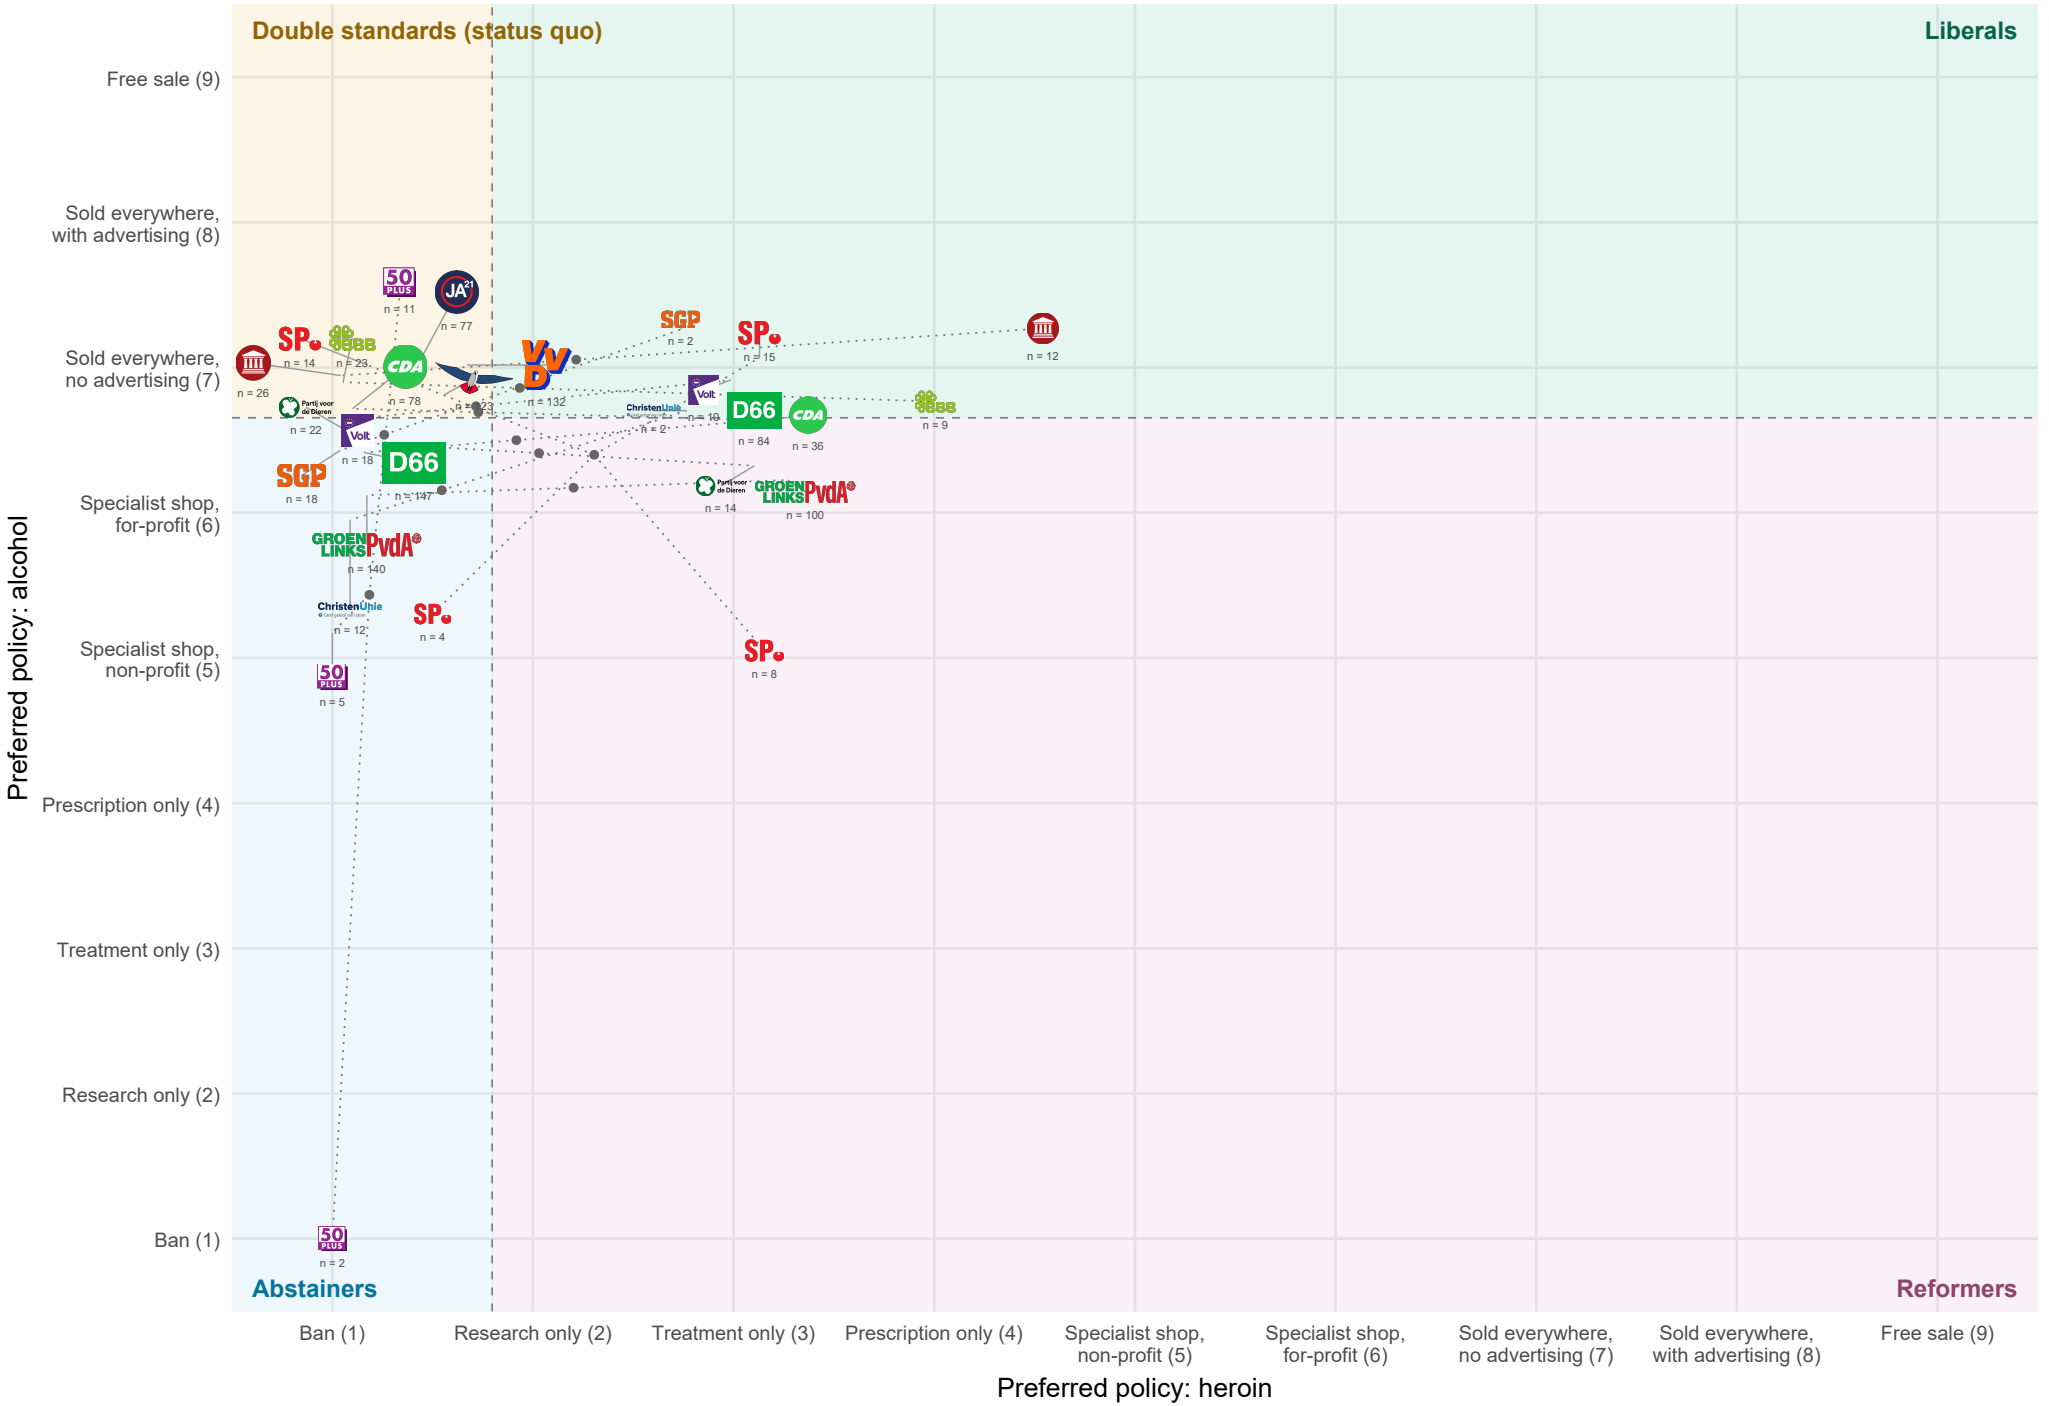

Party camps: speed (x) vs alcohol (y)

Per drug the local maxima marked by hand whose camp holds ≥ 10% of the party; each respondent belongs to the nearest one on both drugs.
A joint camp (logo) = an x and a y maximum together holding ≥ 10% of the party, at the weighted mean answers of its respondents. Grey dot = party mean, dotted lines to its camps. Logo size and n = respondents per camp. Dashed lines = sample means.
Camps per party: 1 (4 parties), 2 (5 parties), 3 (5 parties).

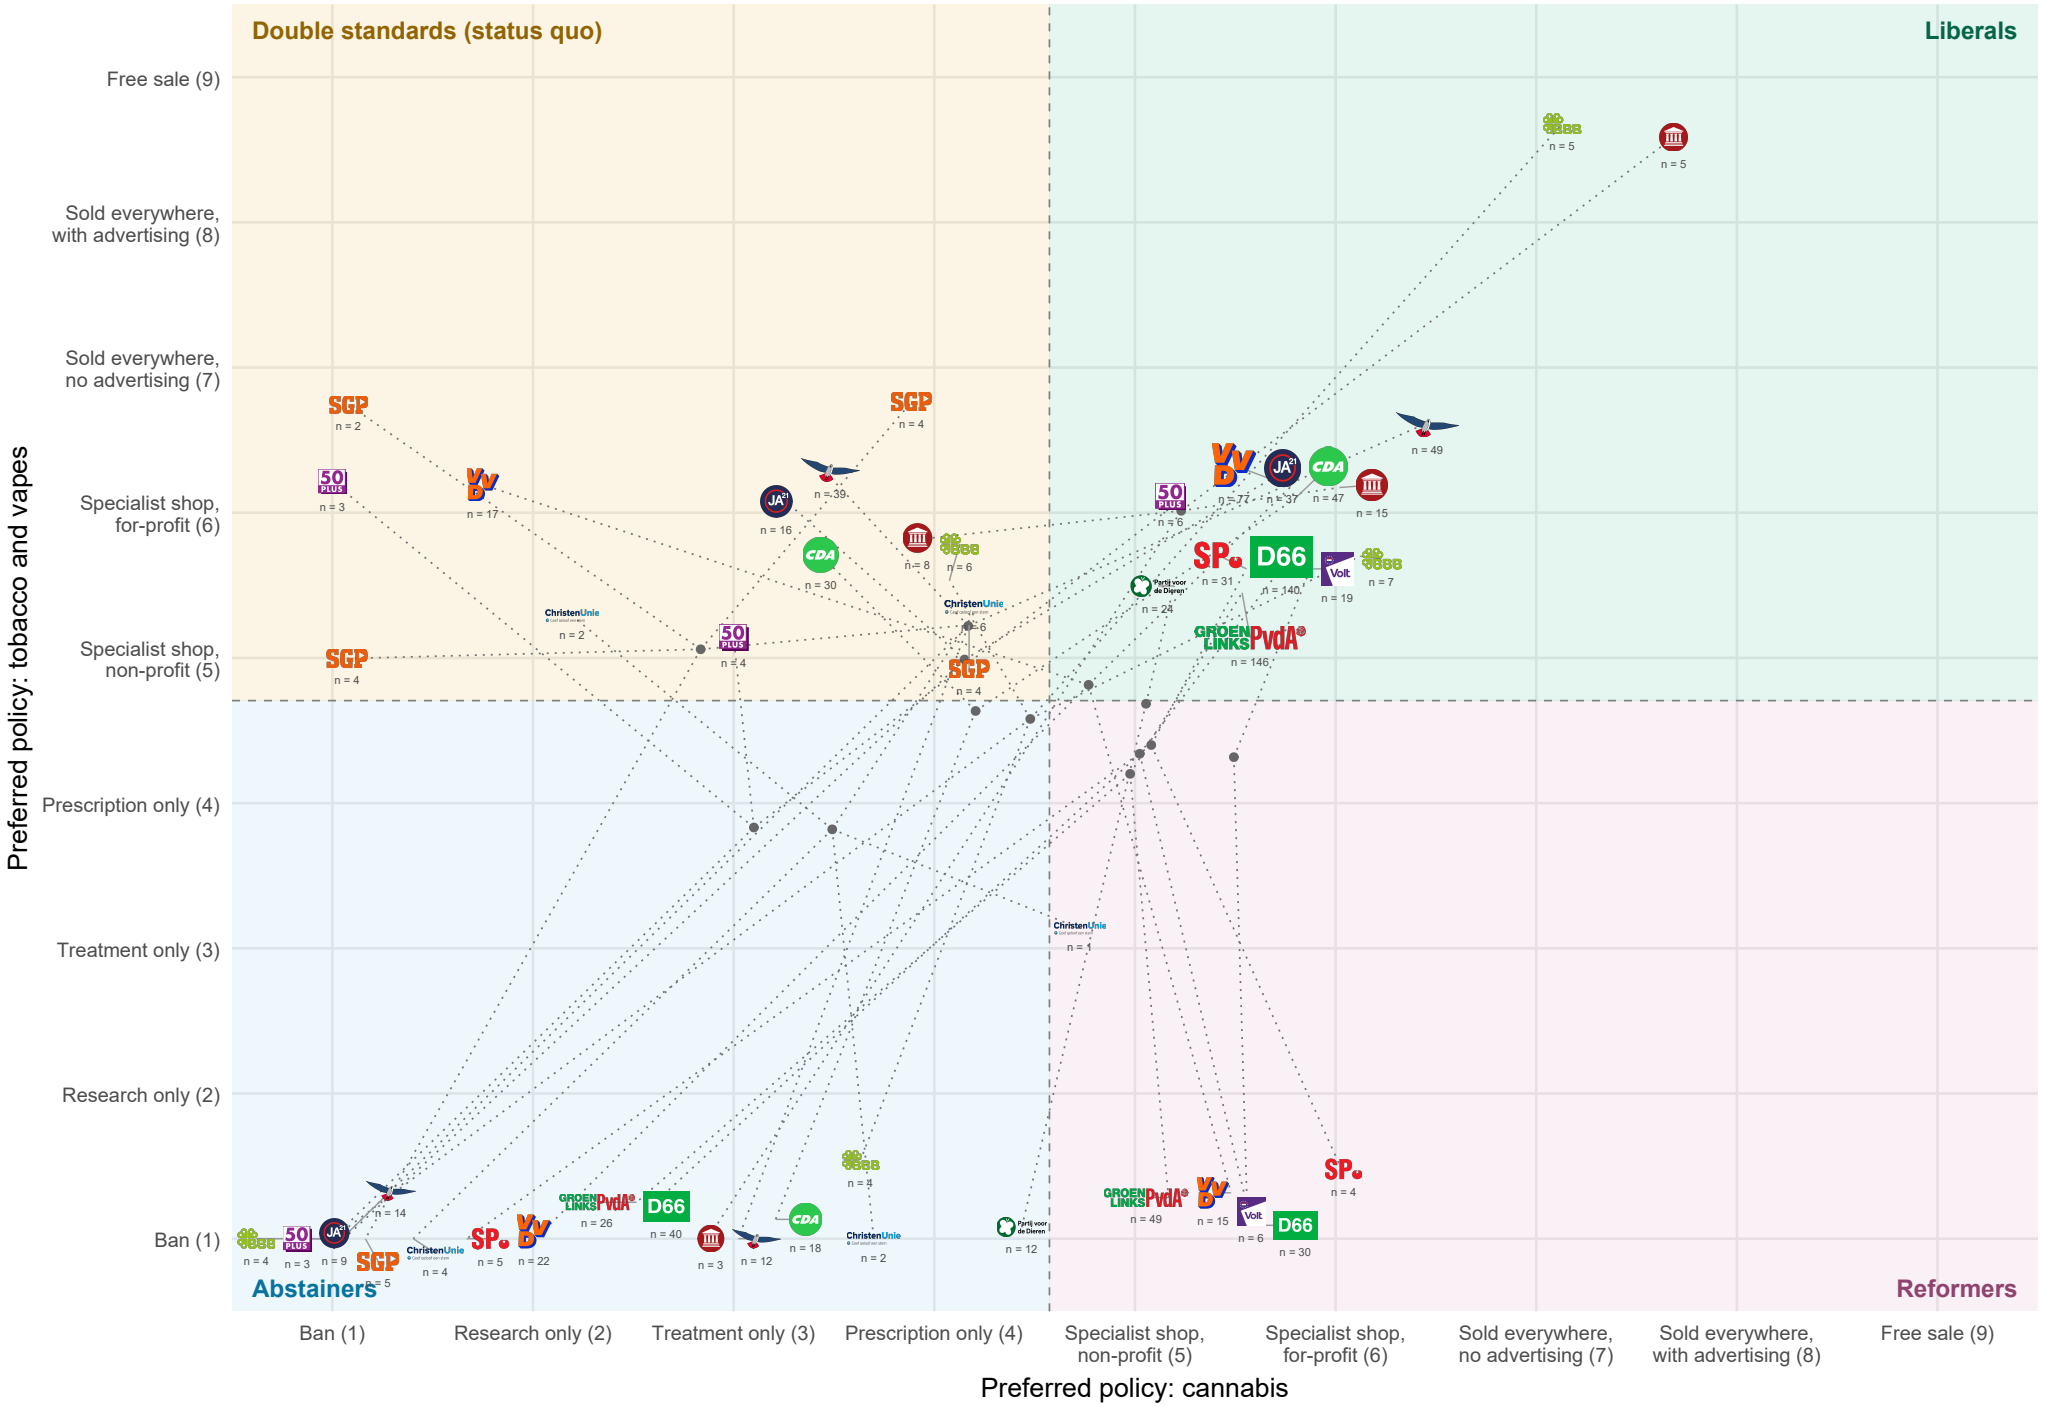

Party camps: heroin (x) vs alcohol (y)

Per drug the local maxima marked by hand whose camp holds ≥ 10% of the party; each respondent belongs to the nearest one on both drugs.
A joint camp (logo) = an x and a y maximum together holding ≥ 10% of the party, at the weighted mean answers of its respondents. Grey dot = party mean, dotted lines to its camps. Logo size and n = respondents per camp. Dashed lines = sample means.
Camps per party: 1 (3 parties), 2 (9 parties), 3 (1 parties), 4 (1 parties).

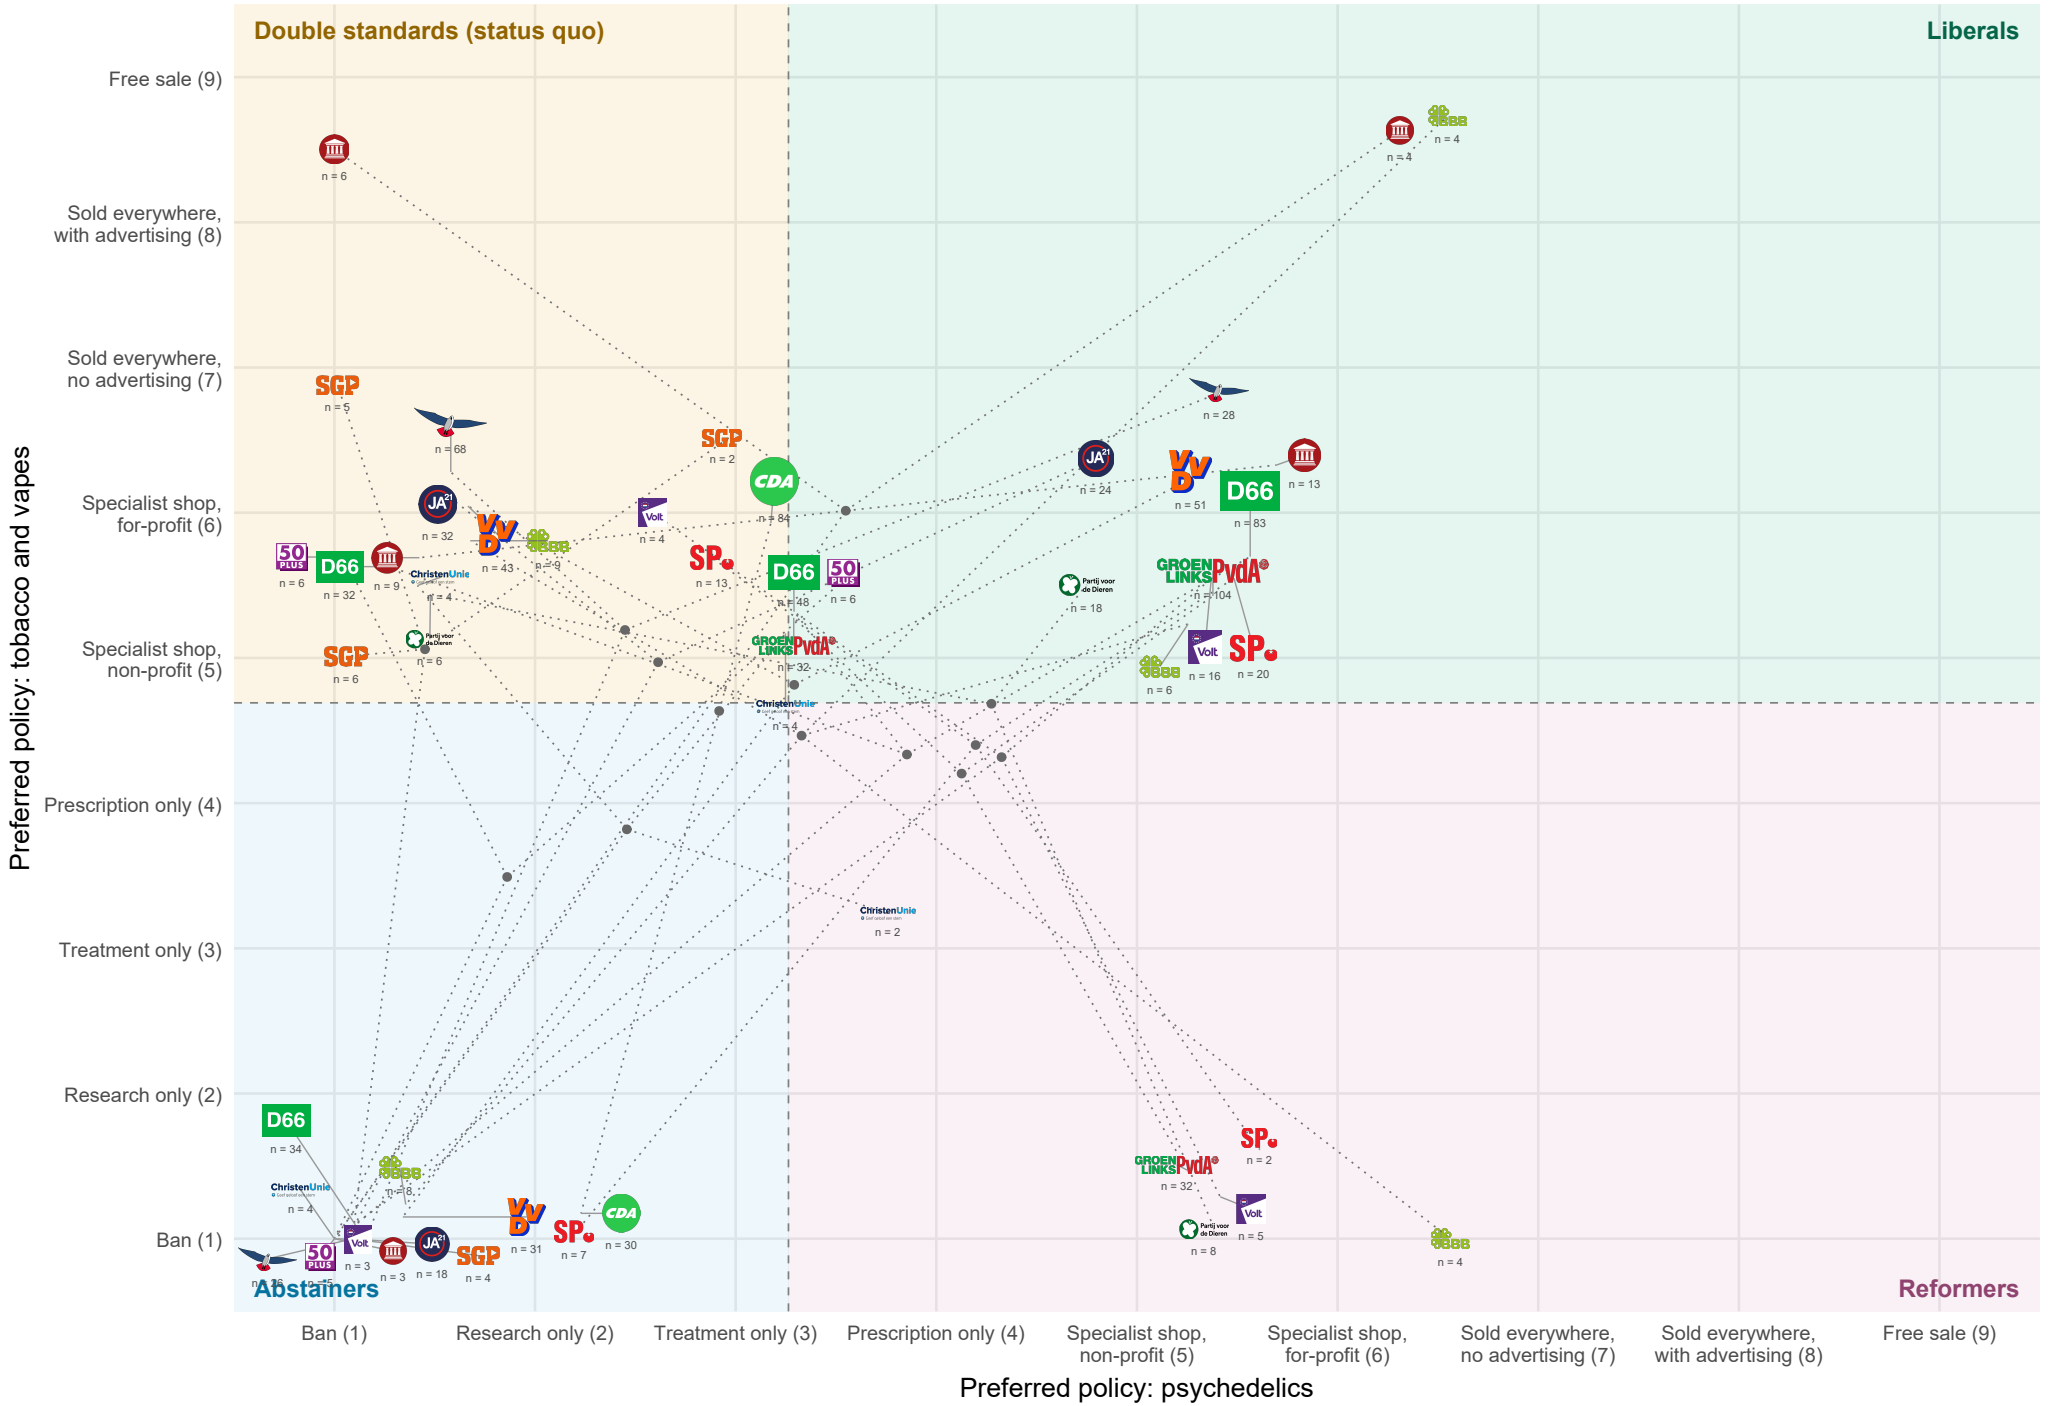

Party camps: cannabis (x) vs tobacco and vapes (y)

Per drug the local maxima marked by hand whose camp holds ≥ 10% of the party; each respondent belongs to the nearest one on both drugs.
A joint camp (logo) = an x and a y maximum together holding ≥ 10% of the party, at the weighted mean answers of its respondents. Grey dot = party mean, dotted lines to its camps. Logo size and n = respondents per camp. Dashed lines = sample means.
Camps per party: 2 (2 parties), 3 (5 parties), 4 (4 parties), 5 (3 parties).

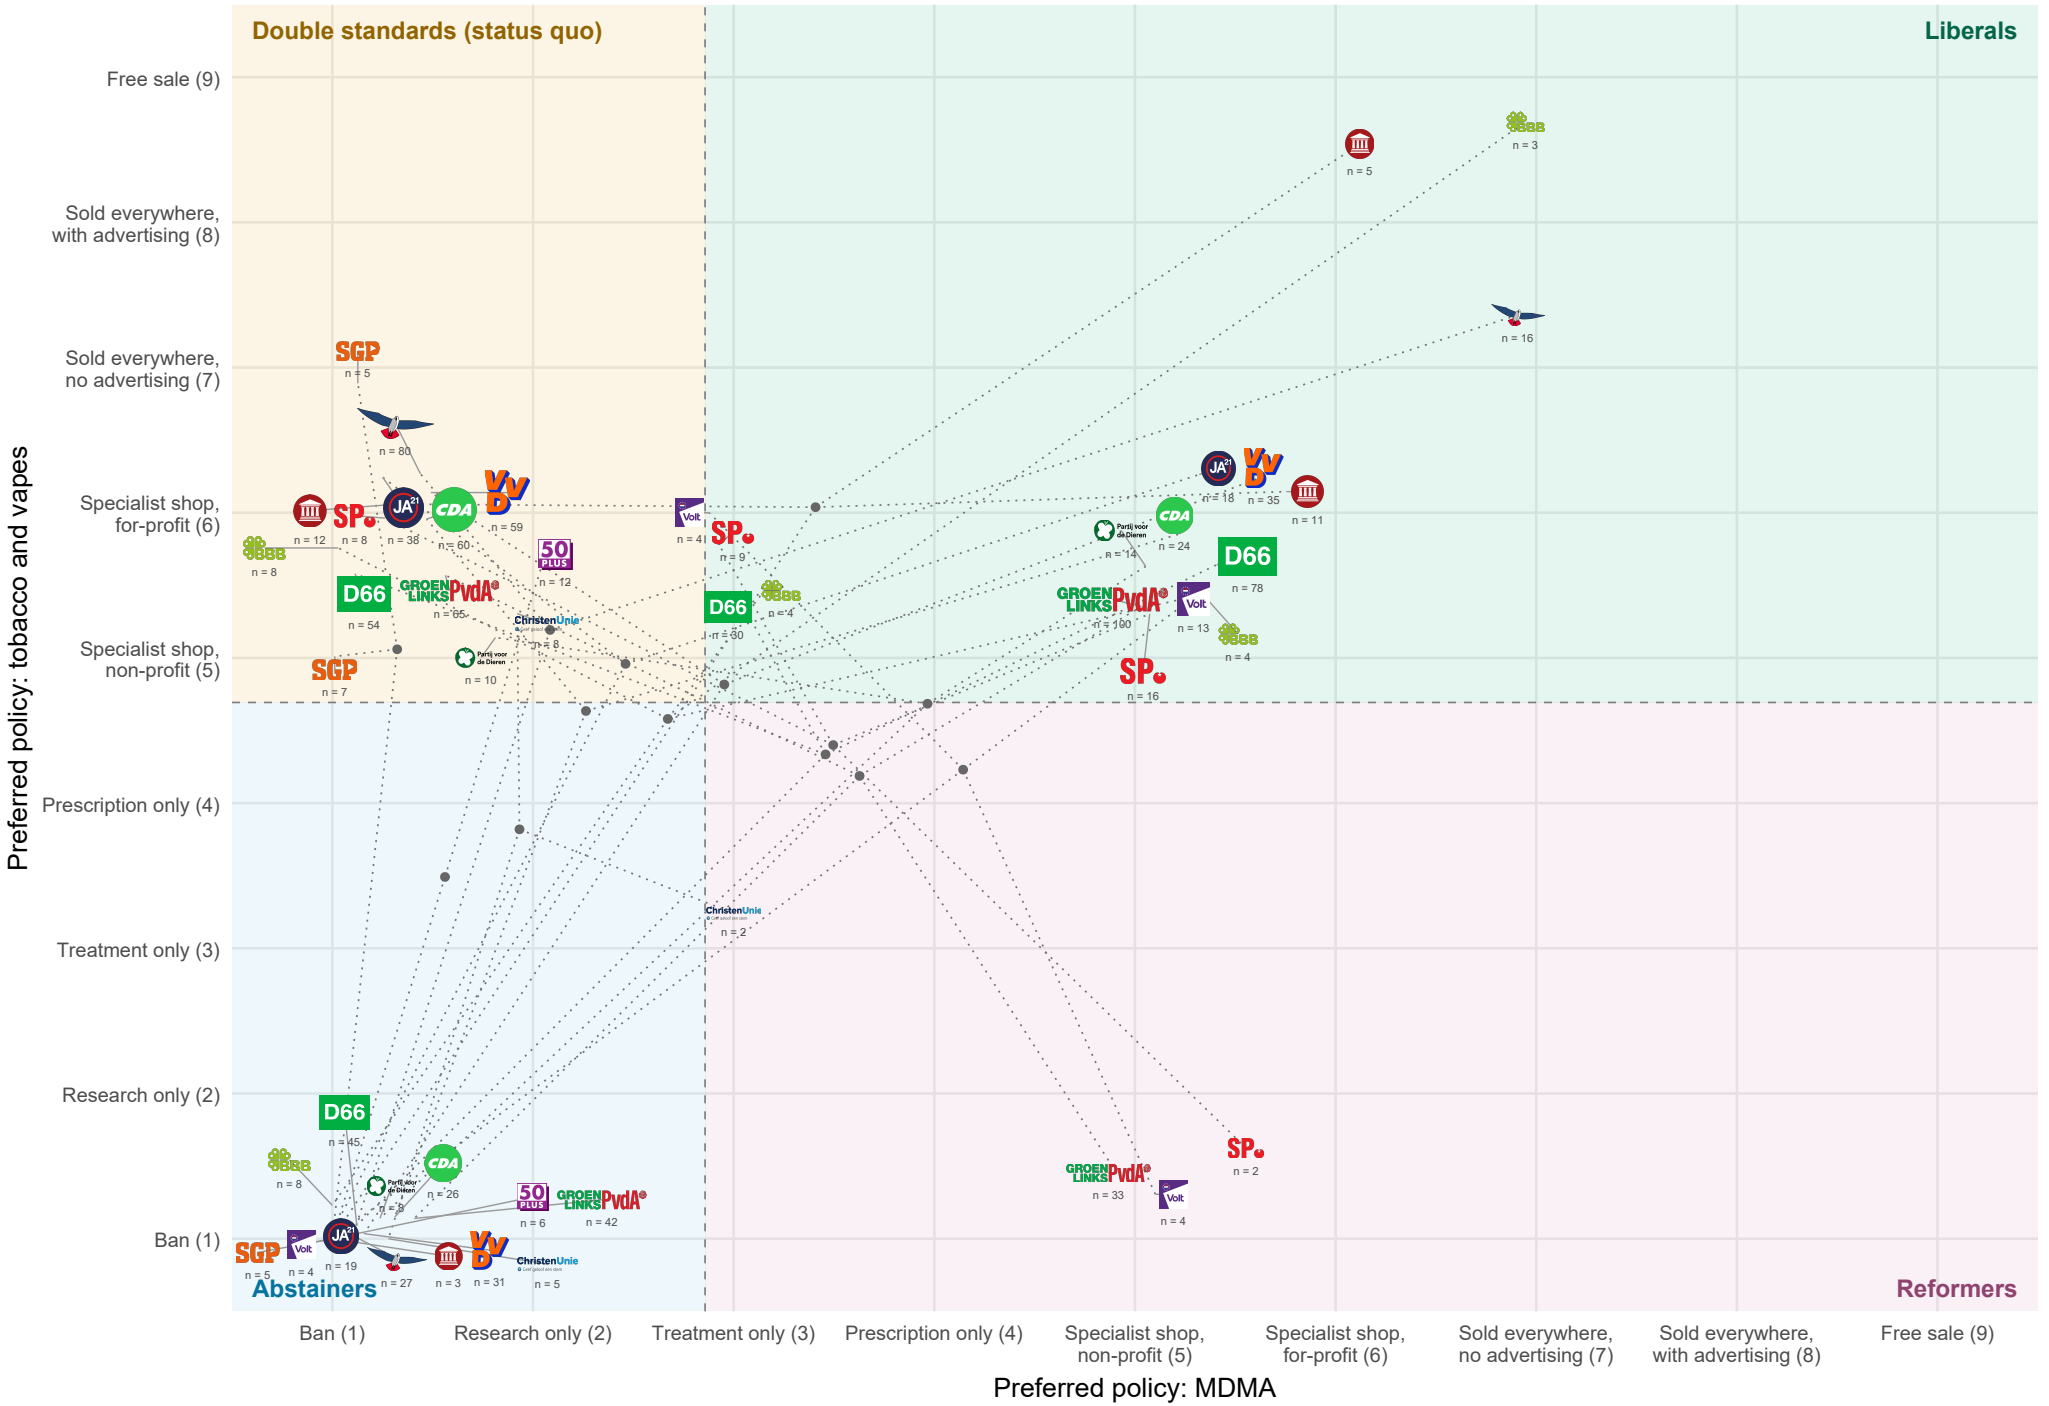

Party camps: psychedelics (x) vs tobacco and vapes (y)

Per drug the local maxima marked by hand whose camp holds ≥ 10% of the party; each respondent belongs to the nearest one on both drugs.
A joint camp (logo) = an x and a y maximum together holding ≥ 10% of the party, at the weighted mean answers of its respondents. Grey dot = party mean, dotted lines to its camps. Logo size and n = respondents per camp. Dashed lines = sample means.
Camps per party: 2 (1 parties), 3 (6 parties), 4 (5 parties), 5 (2 parties).

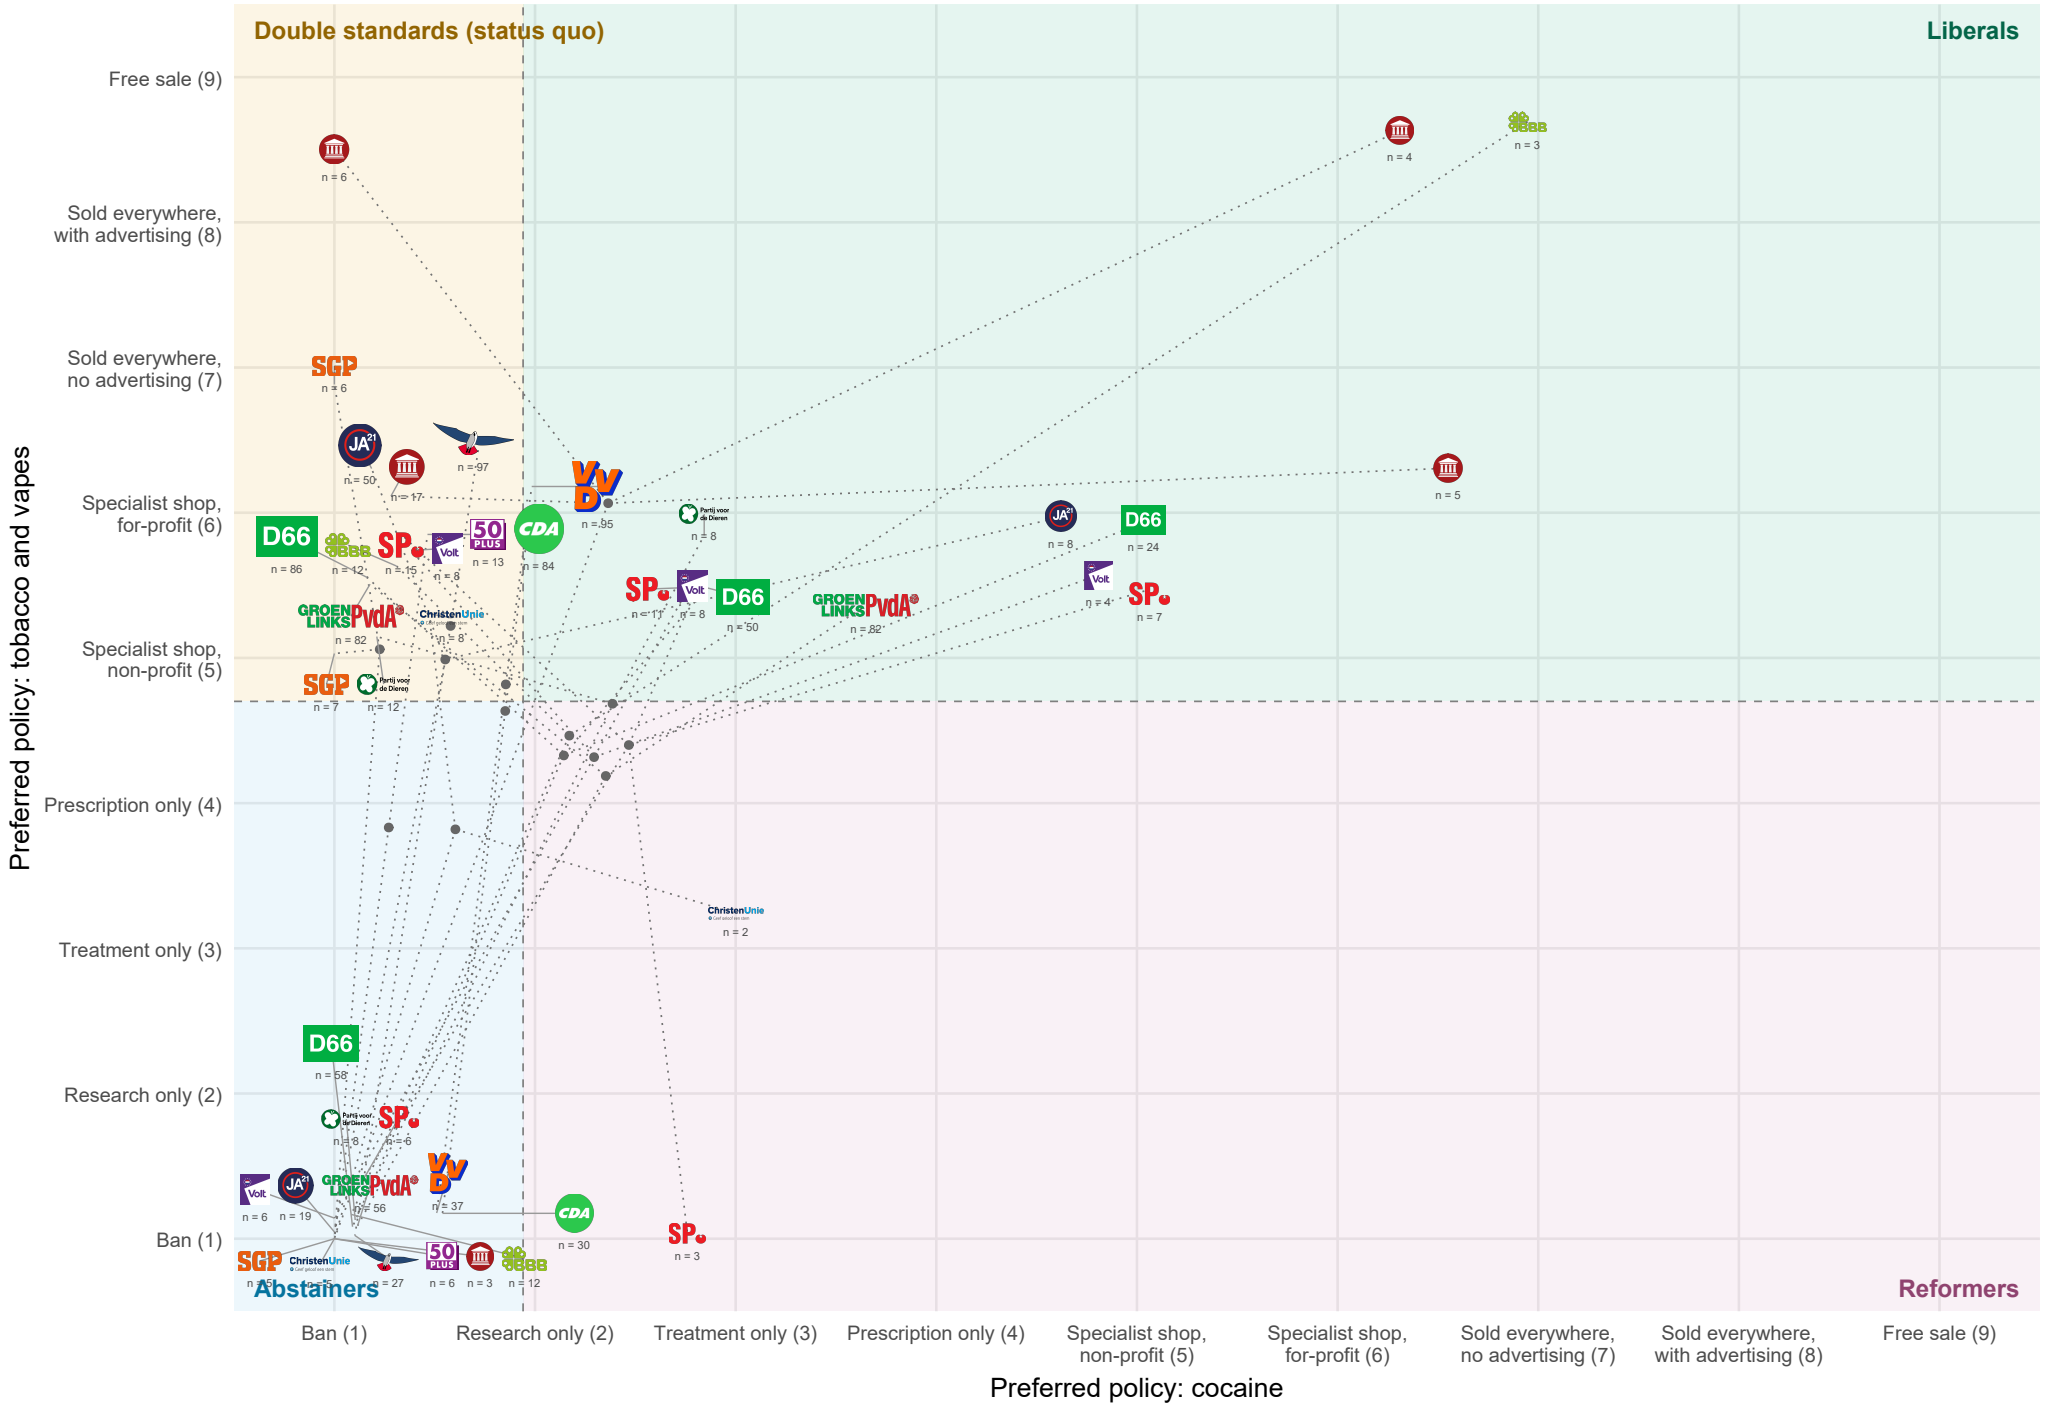

Party camps: MDMA (x) vs tobacco and vapes (y)

Per drug the local maxima marked by hand whose camp holds ≥ 10% of the party; each respondent belongs to the nearest one on both drugs.
A joint camp (logo) = an x and a y maximum together holding ≥ 10% of the party, at the weighted mean answers of its respondents. Grey dot = party mean, dotted lines to its camps. Logo size and n = respondents per camp. Dashed lines = sample means.
Camps per party: 2 (1 parties), 3 (7 parties), 4 (5 parties), 5 (1 parties).

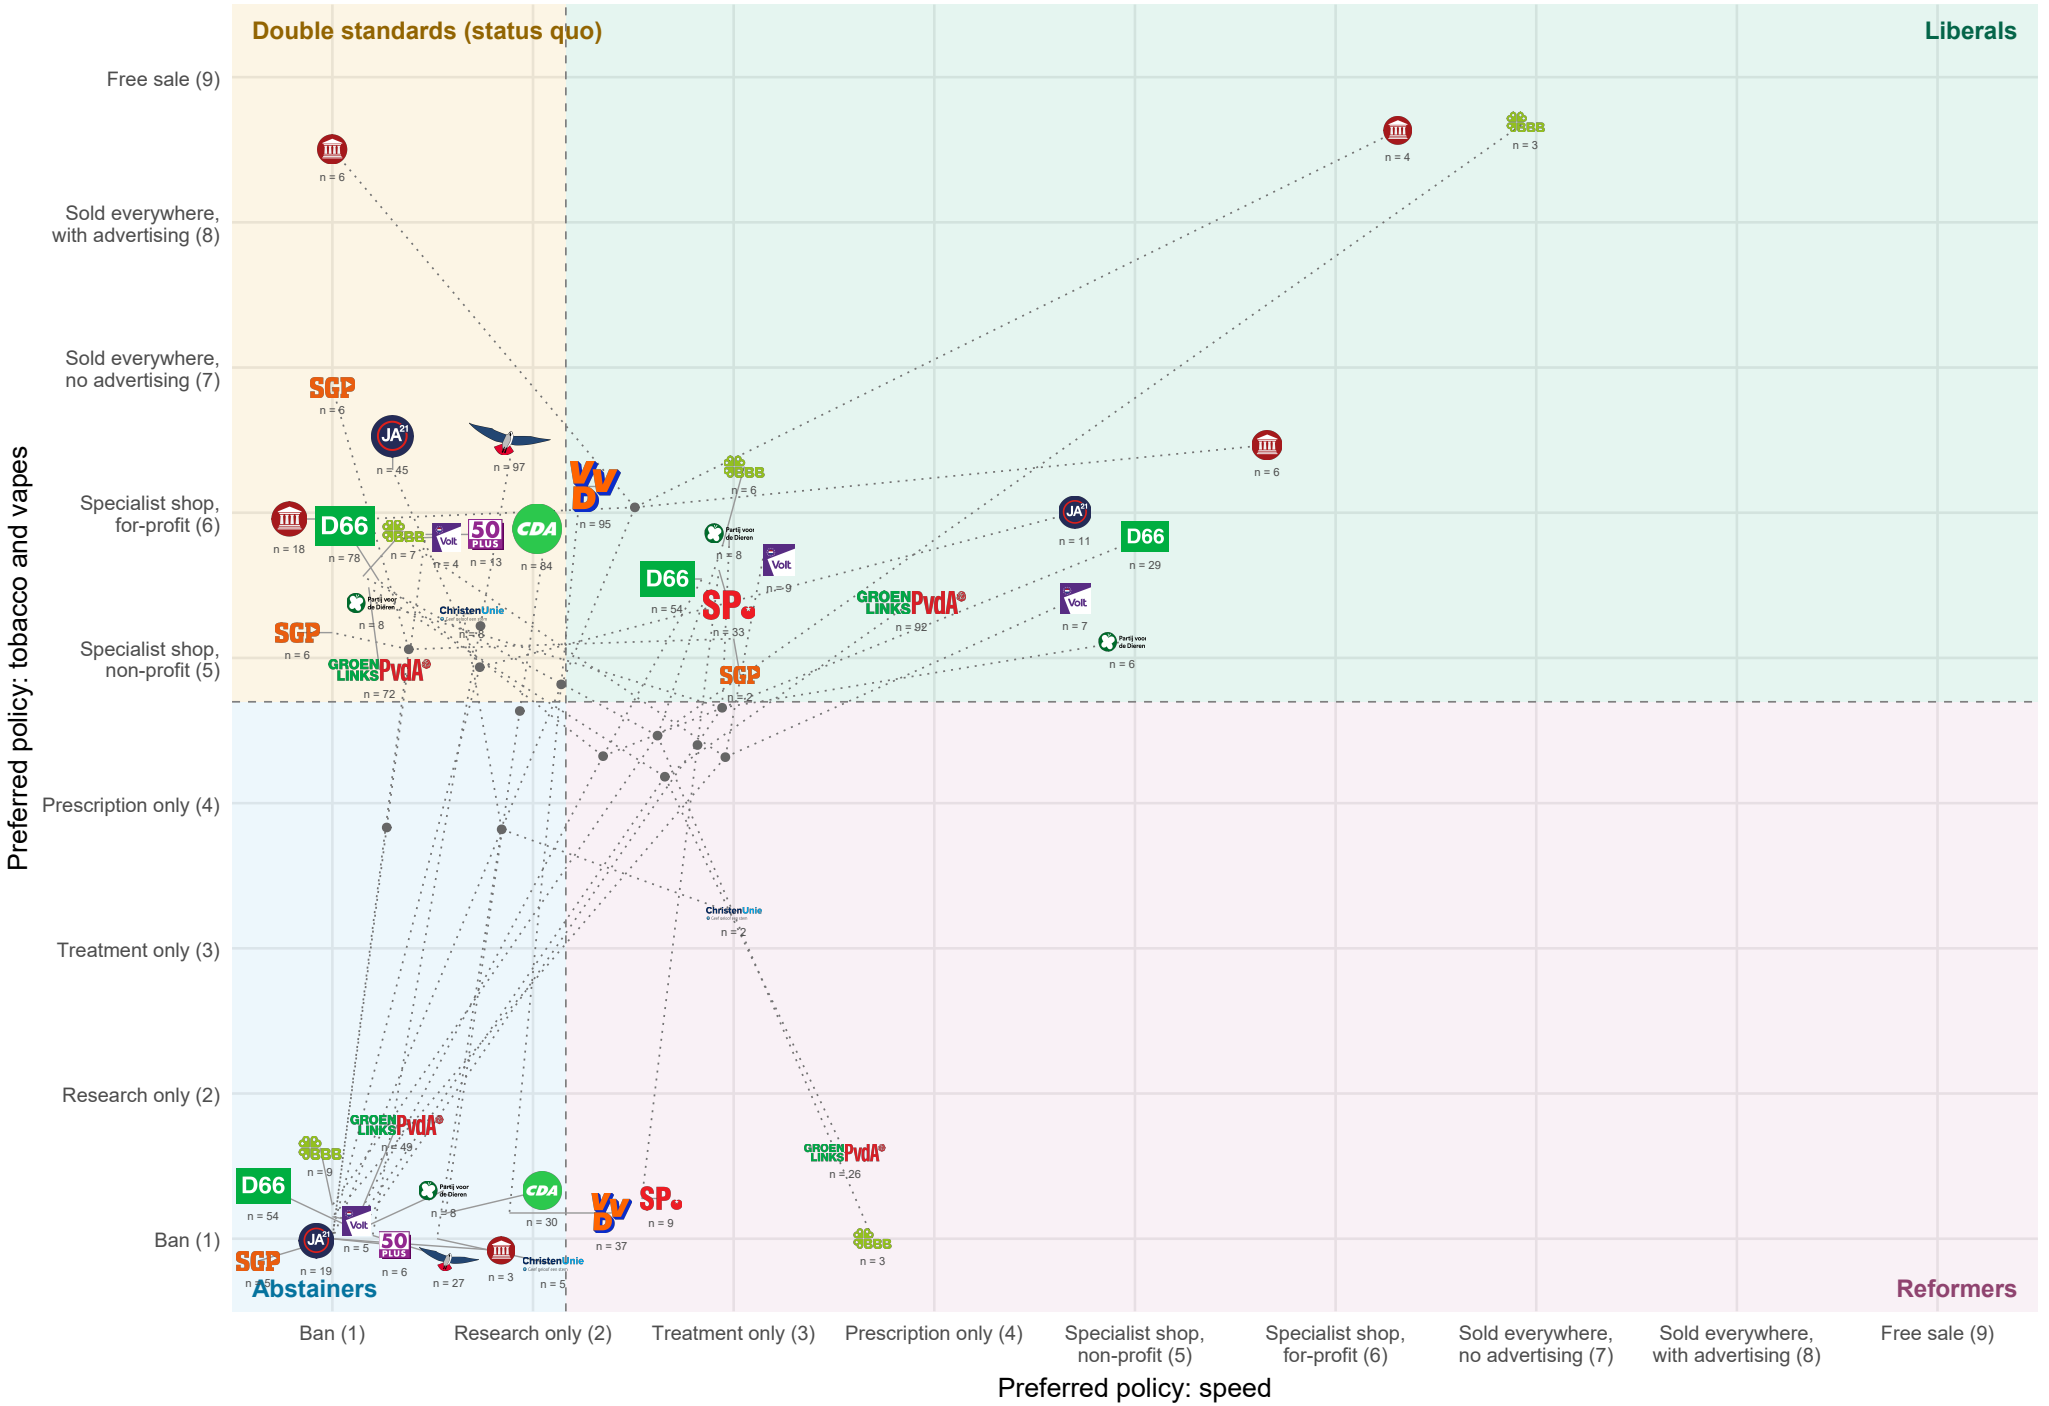

Party camps: cocaine (x) vs tobacco and vapes (y)

Per drug the local maxima marked by hand whose camp holds ≥ 10% of the party; each respondent belongs to the nearest one on both drugs.
A joint camp (logo) = an x and a y maximum together holding ≥ 10% of the party, at the weighted mean answers of its respondents. Grey dot = party mean, dotted lines to its camps. Logo size and n = respondents per camp. Dashed lines = sample means.
Camps per party: 2 (4 parties), 3 (6 parties), 4 (2 parties), 5 (2 parties).

Party camps: speed (x) vs tobacco and vapes (y)

Per drug the local maxima marked by hand whose camp holds ≥ 10% of the party; each respondent belongs to the nearest one on both drugs.
A joint camp (logo) = an x and a y maximum together holding ≥ 10% of the party, at the weighted mean answers of its respondents. Grey dot = party mean, dotted lines to its camps. Logo size and n = respondents per camp. Dashed lines = sample means.
Camps per party: 2 (5 parties), 3 (2 parties), 4 (5 parties), 5 (2 parties).

Party camps: heroin (x) vs tobacco and vapes (y)

Per drug the local maxima marked by hand whose camp holds ≥ 10% of the party; each respondent belongs to the nearest one on both drugs.
A joint camp (logo) = an x and a y maximum together holding ≥ 10% of the party, at the weighted mean answers of its respondents. Grey dot = party mean, dotted lines to its camps. Logo size and n = respondents per camp. Dashed lines = sample means.
Camps per party: 2 (4 parties), 3 (7 parties), 4 (2 parties), 5 (1 parties).
